FOREWORD

This Reference Paper, "Commodity Flow Analysis, Carload All-Rail Traffic Between Canada & the United States, 1968-73", is the first comprehensive survey of railway traffic flows between Canada and the United States that has been published, either in Canada or the United States. It complements the Commodity Flow Analyses for domestic rail traffic for the years 1968-1972 and 1973, (Reference Papers Nos. 1 and 1.1).

For the first time, we now have a reasonably complete picture of Canadian carload all-rail traffic, both domestic and international.

The work of the Traffic & Tariffs Branch (Research) of the Canadian Transport Commission in the preparation of better, and more comprehensive Commodity Flow Analyses is continuing and the coverage of traffic will be gradually expanded and become more detailed. I am sure that these Reference Papers will go a long way in promoting a better understanding of Canadian railway freight traffic and its impact on the Canadian economy.

E. J. Benson,
President,
Canadian Transport Commission.

AVANT-PROPOS

Ce document de référence, «Analyse de Volumes de Denrées — Trafic entièrement ferroviaire par wagons complets entre le Canada et les États-Unis 1968-1973», est la première analyse compréhensive des volumes de trafic entre le Canada et les États-Unis publiée, soit au Canada soit aux États-Unis. Il complète les analyses de volumes de denrées du trafic ferroviaire domestique des années 1968-1972, et 1973, (documents de référence nos 1 et 1.1).

Alors, pour la première fois, nous avons une perspective assez complète du trafic canadien entièrement ferroviaire par wagon complet, national et international, tous les deux.

Les efforts de la Direction de l'Exploitation et des Tarifs (Recherche) de la Commission canadienne des transports dans la préparation d'analyses meilleures et plus compréhensives se continuent. L'analyse du trafic s'étendra et se détaillera davantage. Je suis sûr que ces documents de référence ouvriront la voie à la promotion d'une meilleure compréhension du trafic canadien ferroviaire et de son influence sur l'économie canadienne.

E. J. Benson,
Président,
Commission canadienne des transports.

PREFACE

The present Reference Paper No. 3 has been prepared by Mr. Ian C. W. Spear, Senior Transportation Analyst, under the direction of Mr. D. C. Hackston, Director, Traffic & Tariffs Study Division of the Traffic & Tariffs Branch (Research) of the Canadian Transport Commission.

The methods used do not permit the disaggregation of individual, specific commodity movements. However, the Traffic & Tariffs Branch is prepared to supply, on a cost recovery basis, details of the traffic flows between provinces, as defined in the Reference Paper, and individual American States but only on the basis of the five commodity groupings used.

It is hoped that this Reference Paper will provide an insight into international traffic between Canada and the United States, for which no data were previously available.

J. Hanley,
Executive Director,
Traffic & Tariffs Branch (Research),
Canadian Transport Commission.

PREFACE

Le présent document de référence n° 3 a été préparé par M. Ian C. W. Spear, premier analyste, sous la direction de M. David C. Hackston, directeur, Division d'Études de Trafic et de Tarifs, de la Direction de l'Exploitation et de Tarifs (Recherches) de la Commission canadienne des transports.

Les méthodes dont on s'est servi ne permettent pas de désagréger les mouvements particuliers et spécifiques de denrées. La Direction de l'Exploitation et de Tarifs s'apprête à fournir, sur une base de recouvrement des fonds, des détails des volumes de trafic entre les provinces, telles que définies dans le document de référence, et les états individuels américains, mais doit se limiter aux cinq groupes de denrées du texte.

On espère que ce document de référence fournira un aperçu du trafic entre le Canada et les États-Unis, pour lequel aucune donnée n'était disponible auparavant.

J. Hanley,
Directeur exécutif,
Direction de l'Exploitation et
des Tarifs (Recherche),
Commission canadienne des transports.

Commodity Flow Analysis
Carload All-Rail Traffic Between
Canada & the United States
1968-1973

Explanatory Foreword

The data set out in this Reference Paper No. 3 of the Traffic and Tariffs Branch (Research) of the Canadian Transport Commission was derived from the computer tape records of Canadian National Railways and CP Rail. The program for extraction of the data was designed and prescribed by the Traffic and Tariffs Branch (Research). The resulting computer printouts were used to derive the 208 statistical tables contained in this Reference Paper.

The following types of movement were excluded from the program:

- a) Less-than-carload traffic;
- b) Express and non-carload traffic;
- c) Lake-and-rail and Rail-lake-and-rail carload movements;
- d) Container traffic;
- e) Piggyback Movements;
- f) Traffic originating (Canada to U.S.) and terminating (U.S. to Canada) on lines other than Canadian National and CP Rail;
- g) Freight carried on company service (O.C.S.).

This Reference Paper, therefore, consists of a six-year (1968-73) analysis of carload revenue freight traffic originating in Canada and terminating in the United States and traffic originating in the United States and terminating in Canada. This analysis includes import and export traffic from Canadian and American ports (i.e. to or from countries other than Canada and the United States) and also a small amount of traffic moving from an American origin to an American destination using Canadian railway lines on some segment of the movement and designated as having a Canadian origin. It is estimated that the data contained in this Reference Paper approximates 60% of the total revenue tonnage on all classes of railways for all types of traffic moving from Canada to the United States and 67% of the total revenue tonnage on all classes of railways for all types of traffic moving from the United States to Canada.

The commodity classification used in this Reference Paper is the Canadian Freight Commodity Statistics Classification (adopted January 1, 1957 and used by Statistics Canada up to the year ending December 31, 1969) because this classification was more closely related to the railway freight rate structure than the Statistics Canada Commodity Classification.

Analyse du Volume des Dénrées
Trafic entièrement ferroviaire par wagons complets
entre le Canada et les États-Unis
1968-1973

Avant-Propos

Les données que renferme ce document de référence n° 3 de la Direction de l'exploitation et des tarifs (Recherche) de la Commission canadienne des transports ont été tirées des enregistrements mécanographiés des Chemins de fer Nationaux et du Canadien Pacifique. Le programme d'extraction des données a été conçu et préconisé par la Direction de l'exploitation et des tarifs (Recherche). Les imprimés mécanographiés ont servi à l'établissement des 208 tableaux de statistiques inclus dans ce document de référence.

Les classes suivantes des mouvements ont été exclues du programme:

- a) Trafic de détail;
- b) Messageries et chargements incomplets;
- c) Mouvements par wagons complets eau — rail et rail — eau — rail;
- d) Mouvements de containers;
- e) Remorques-rail-route;
- f) Trafic provenant du Canada à destination des États-Unis ou vice versa acheminé sur les lignes autres que celles des Chemins de fer Nationaux ou du Canadien Pacifique;
- g) Fret transporté pour les besoins de la société.

Ce document de référence, alors, comprend une analyse de six années (1968-1973) du trafic payant par wagons complets en provenance du Canada et du trafic provenant des États-Unis à destination du Canada. Cette analyse inclue du trafic d'importation et d'exportation acheminé des ports canadiens et américains (c'est-à-dire, jusqu'aux ou en provenance des pays autres que le Canada et les États-Unis) et inclue également un certain volume du trafic acheminé d'une origine américaine à destination d'un endroit américain par des chemins de fer canadiens pour une partie du mouvement.

On estime que les données incluses dans ce document de référence comprennent approximativement 60% du total du tonnage payant en provenance du Canada et à destination des États-Unis par toutes les classes de chemin de fer, et ce, pour tous types de mouvement. Elles représentant 67% du total du tonnage payant de tout genre de trafic acheminé par toutes les classes de chemin de fer des États-Unis jusqu'au Canada.

On a eu recours à la classification des denrées employée pour ce document de référence, la *Canadian Freight Commodity Statistics Classification* (adoptée le premier janvier 1957 et utilisée par Statistique Canada jusqu'au 31 décembre 1969) parce que cette classification se rapprochait plus à la structure tarifaire de marchandises des chemins de fer que la classification des denrées de Statistique Canada.

The commodity groupings used in this Reference Paper are as follows:

- a) Products of Agriculture
- b) Animals and Animal Products
- c) Products of Mines
- d) Products of Forests
- e) Manufactured and Miscellaneous Products

The major commodities in each group are:

PRODUCTS OF AGRICULTURE

Wheat
Other grain
Grain Products
Potatoes
Other vegetables, fresh and frozen
Fruits, fresh and frozen
Other agricultural products

ANIMALS & ANIMAL PRODUCTS

Livestock
Meats, fresh and frozen
Other meats, fish and packing house products (edible)
Other animal products

PRODUCTS OF MINES

Coal
Potash
Sulphur
Iron ore and concentrates (incl. pellets)
Copper ores and concentrates
Copper-nickel ores and concentrates
Lead and zinc ores and concentrates
Other ores and concentrates
Alumina, bauxite and other aluminum ores
Sand, gravel and crushed stone
Gypsum, crude
Cement, natural and portland
Asbestos, crude
Phosphate rock
Salt
Other mine products
Coke

PRODUCTS OF FORESTS

Lumber
Plywood
Pulpwood
Pulpwood chips
Logs, poles and other forest products

MANUFACTURED & MISCELLANEOUS

Iron and steel — Primary and manufactured
Aluminum — Primary and manufactured
Copper — Primary and manufactured
Non-ferrous metals, n.e.s. — Primary and manufactured
Scrap and waste metals
Machinery and parts
Passenger automobiles
Freight automobiles
Agricultural implements and parts
Other motor vehicles
Vehicle parts
Gasoline
Fuel oil
Liquified petroleum gas

Les groupes de denrées que renferme ce document de référence sont comme suit

- a) Produits agricoles
- b) Animaux et produits dérivés
- c) Produits miniers
- d) Produits forestiers
- e) Manufactures et produits divers

Les denrées principales de chaque groupe sont:

Produits agricoles

Blé
Autres céréales
Produits céréaliers
Pommes de terre
Autres légumes frais et congelés
Autres produits agricoles

Animaux et produits dérivés

Bétail
Viandes fraîches et congelées
Autres viandes, poissons et conserves comestibles
Autres produits d'origine animale

Produits miniers

Charbon
Potasse
Soufre
Minerais et concentrés de fer (y compris les boulettes)
Minerais et concentrés de cuivre
Minerais et concentrés de cuivre-nickel
Minerais et concentrés de plomb et de zinc
Autres minerais et concentrés
Alumine, bauxite et autres minerais d'aluminium
Sable, gravier et pierre concassée
Gypse brut
Ciment naturel et Portland
Amiante brut
Phosphate en roche
Sel
Autres produits miniers
Coke

Produits forestiers

Bois de construction
Contre-plaqué
Bois à pâte
Copeaux de bois à pâte
Billes, poteaux et autres produits forestiers

Manufactures et produits divers

Fer et acier — primaires et ouvrés
Aluminium — primaire et ouvré
Cuivre — primaire et ouvré
Métaux non ferreux, n.d.s. — primaires et ouvrés
Débris de métaux
Machines et pièces
Voitures particulières
Véhicules utilitaires
Machines agricoles et pièces
Autres véhicules automobiles
Pièces de véhicules
Essence
Mazout
Gaz de pétrole liquéfiés

Other refined petroleum products
Sulphuric acid
Salt cake (sodium sulphate)
Gases other than petroleum
Other chemicals and acids
Woodpulp
Newsprint paper
Paperboard, pulpboard and fibreboard
Paper other than newsprint
Packaging containers (not C.O.F.C. containers)
Building materials
Sugar
Beverages
Dairy and other food products
Animal and poultry feed
Vegetable oils
Plastic and cellulose products
Fertilizers (excluding potash)
Manufactured and miscellaneous goods
Pool car traffic

Throughout the document, the data has been arranged in origin-destination matrices of provinces and states. The four Atlantic Provinces (New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland) have been considered as a single "province" reducing the number of "provinces" to seven as follows:

- | | |
|--------------|---------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Quebec | 6) Alberta |
| 3) Ontario | 7) British Columbia |
| 4) Manitoba | |

For the purposes of this document, the United States includes, with the exception of Hawaii, all states plus the District of Columbia. The states have been grouped into nine major groupings based on the U.S. Census Divisions and on our own examination of the traffic flow between Canada and the United States.

Northeast 1 (NE1)

Maine
New Hampshire
Vermont
Massachusetts
Connecticut
Rhode Island

Northeast 2 (NE2)

New York
New Jersey
Pennsylvania

Northcentral 1 (NC1)

Michigan
Ohio

Northcentral 2 (NC2)

Illinois
Indiana
Wisconsin

Northcentral 3 (NC3)

Minnesota
Iowa
Missouri
North Dakota
South Dakota
Nebraska
Kansas

South 1 (S1)

Maryland
Delaware
District of Columbia
Virginia
West Virginia

South 2 (S2)

Alabama
Mississippi
Arkansas
Louisiana
Oklahoma

Autres dérivés raffinés du pétrole
Acide sulfurique
Saignon (sulfate de soude)
Gaz autres que de pétrole
Autres produits chimiques et acides
Pâte de bois
Papier journal
Carton, carton-pâte et carton-fibre
Papier autre que le papier journal
Conteneurs (autres que pour rail-route)
Matériaux de construction
Sucre
Boissons
Produits laitiers et autres produits alimentaires
Aliments pour animaux et volaille
Huiles végétales
Produits en plastique et en cellulose
Engrais (sauf la potasse)
Produits ouvrés et divers
Trafic de marchandises en commun

Les données que renferme ce document ont été présentées dans des matrices d'origine-destination des provinces et des états. Les quatre provinces maritimes (le Nouveau-Brunswick, La Nouvelle-Écosse, l'Île-du-Prince-Édouard et Terre-Neuve) ont été traitées comme une province unique, ce qui a réduit le nombre de «provinces» à sept comme suit:

- | | |
|--------------|-------------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Québec | 6) Alberta |
| 3) Ontario | 7) Colombie-Britannique |
| 4) Manitoba | |

Aux fins de ce document, les États-Unis comprennent (à l'exception de Hawaii) tous les états, et en plus, le District of Columbia. Les états ont été rassemblés dans neuf groupes principaux qui sont fondés sur notre propre analyse et celle de *U.S. Census Divisions* des mouvements entre le Canada et les États-Unis.

Nord Est 1 (NE1)

Maine
New Hampshire
Vermont
Massachusetts
Connecticut
Rhode Island

Nord Est 2 (NE2)

New York
New Jersey
Pennsylvania

Nord Central 1 (NC1)

AMERICAN ORIGINS AND DESTINATIONS
ORIGINES ET DESTINATIONS AMÉRICAINES

CANADIAN ORIGINS AND DESTINATIONS
ORIGINES ET DESTINATIONS CANADIENNES

The 208 statistical tables are grouped in five sections as follows:

- a) **Section 1** — 72 tables showing cars, tons, Canadian Revenue, American Revenue, ton-miles and car-miles to the international boundary in a province-state origin-destination matrix, by years and by commodity groups. Both Canada to the United States and United States to Canada traffic are represented.

Les 208 tableaux de statistiques sont groupés en cinq sections comme suit:

- a) **Section 1** — 72 tableaux montrant wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à destination de la frontière internationale dans une matrice province-état origine-destination, par années et par groupes de denrées. Le trafic du Canada aux États-Unis et celui des États-Unis au Canada sont tous les deux représentés.

- b) **Section 2** — 64 tables showing average revenue per ton (total Canada and U.S.), average revenue per ton (Canadian portion), average length of haul (to international boundary) and average load per car in a province-state origin-destination matrix, by years and by commodity groups. Traffic in both directions is represented.
 - c) **Section 3** — 36 tables showing Canada originated traffic, Canada terminated traffic, United States originated traffic and United States terminated traffic, by years and by commodity groups, in terms of cars, tons, Canadian revenue, American revenue, ton-miles and car-miles to the international boundary with a percentage distribution by commodity group.
 - d) **Section 4** — 18 tables showing the distribution of Tonnage for Canada to United States traffic and for United States to Canada traffic for all commodity groups and years and also showing the ratio of Canada to U.S. Tonnage versus U.S. to Canada Tonnage for all commodity groups and years for each origin-destination pairing.
 - e) **Section 5** — 18 tables showing the distribution of Total Revenue for Canada to United States traffic and for United States to Canada traffic for all commodity groups and years and also showing the Canadian percentage of the Total Revenue for each commodity group and year for each origin-destination pairing.
- b) **Section 2** — 64 tableaux montrant le revenu moyen par tonne (total Canada et États-Unis), revenu moyen par tonne (portion canadienne), déplacement moyen (jusqu'à la frontière internationale) et chargement moyen par wagon dans une matrice province-état origine-destination, par années et par groupes de denrées. Le trafic dans les deux directions est représenté.
 - c) **Section 3** — 36 tableaux présentant le trafic provenant du Canada, le trafic terminé au Canada, le trafic provenant des États-Unis et le trafic terminé aux États-Unis, par années et par groupes de denrées, en termes de wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à la frontière internationale avec un pourcentage de distribution par groupe de denrée.
 - d) **Section 4** — 18 tableaux montrant la distribution du Tonnage pour le trafic acheminé du Canada aux États-Unis et le trafic des États-Unis au Canada pour tous les groupes de denrées et les années et montrant aussi la proportion du Tonnage du Canada aux États-Unis contre le Tonnage des États-Unis au Canada pour tous les groupes de denrées et les années pour chaque accouplement origine-destination.
 - e) **Section 5** — 18 tableaux montrant la distribution de revenu total pour le trafic acheminé du Canada aux États-Unis et pour le trafic des États-Unis au Canada pour tous les groupes de denrées et les années et montrant aussi le pourcentage canadien du revenu total pour chaque groupe de denrées et l'année pour chaque accouplement origine-destination.

Commodity Flow Analysis
Carload All-Rail Traffic Between
Canada & the United States
1968-1973

Introduction

In 1974, the Traffic Studies Division of the Traffic and Tariffs Branch (Research) produced and published its Reference Paper No. 1 entitled "Commodity Flow Analysis — Canadian Carload All-Rail Traffic 1968-1972" which was a five-year analysis of local carload revenue freight traffic originating and terminating in Canada and carried on Canadian National and CP Rail lines. At that time, it was felt that there was a need to supplement that study with an examination of the traffic between Canada and the United States in order to obtain a comprehensive factual base for studies relating to the Canadian transportation industry and its associated problems. It is hoped that this document, Reference Paper No. 3, will satisfy this need and complete the overview of Canadian revenue freight traffic.

As is the case with Reference Paper No. 1, it is intended to update this Paper by issuing yearly supplements as well as a five-year summary at the end of each five-year period.

Using the year 1973 as an illustration, this paper shows that Canada to United States traffic via Canadian National and CP Rail amounted to 26.7 million tons and 627.6 million dollars while United States to Canada traffic via the same two major railways totalled 9.8 million tons and 269.1 million dollars. In other words, there was 2.7 times as much southbound traffic as northbound traffic accounting for 2.3 times as much revenue.

The Canada-U.S. traffic is dominated by the following three Commodity Groupings; Manufactured and miscellaneous Products — 53.4% of the tonnage and 52.6% of the revenue; Mine Products — 30.6% of the tonnage and 24.1% of the revenue; and Forest Products — 14.8% of the tonnage and 22.1% of the revenue. The U.S.-Canada traffic, on the other hand, is dominated by the following Commodity Groupings; Manufactured and Miscellaneous Products — 52.7% of the tonnage and 61.5% of the revenue; Mine Products — 31.3% of the tonnage and 14.6% of the revenue; Products of Agriculture — 10.7% of the tonnage and 17.5% of the revenue. It can be seen from these figures and from graph #1 that with the exception of Products of Agriculture, the southbound traffic is generally much greater than the northbound traffic including Manufactured and Miscellaneous Products where the ratio of southbound to northbound traffic in tons is 2.8 to 1.

Analyse du Volume des Denrées
Trafic entièrement ferroviaire par wagons complets
entre le Canada et les États-Unis
1968-1973

Introduction

En 1974, la division d'Études de Trafic de la Direction de l'Exploitation et de Tarifs (Recherche) a produit et publié son document de référence n° 1 sous titre «Analyse de Volume de Denrées — Trafic canadien par Rail-Wagon (complet) 1968-1972» qui constituait une analyse quinquennale du trafic local payant par wagon complet d'origine et à destination canadienne acheminé sur des voies des Chemins de fer Nationaux et du Canadien Pacifique. A cette époque il s'avérait nécessaire de compléter l'analyse par un examen du trafic entre le Canada et les États-Unis afin d'obtenir une base compréhensive des faits pour des études reliées à l'industrie de transport canadien et aux problèmes connexes. On espère que ce document, n° 3 de référence, répondra à ce besoins et complètera la perspective du trafic canadien payant.

Ainsi que pour le document de référence n° 1, on prétend mettre à jour ce document en publiant des suppléments à tous les ans ainsi qu'un résumé à tous les 5 ans.

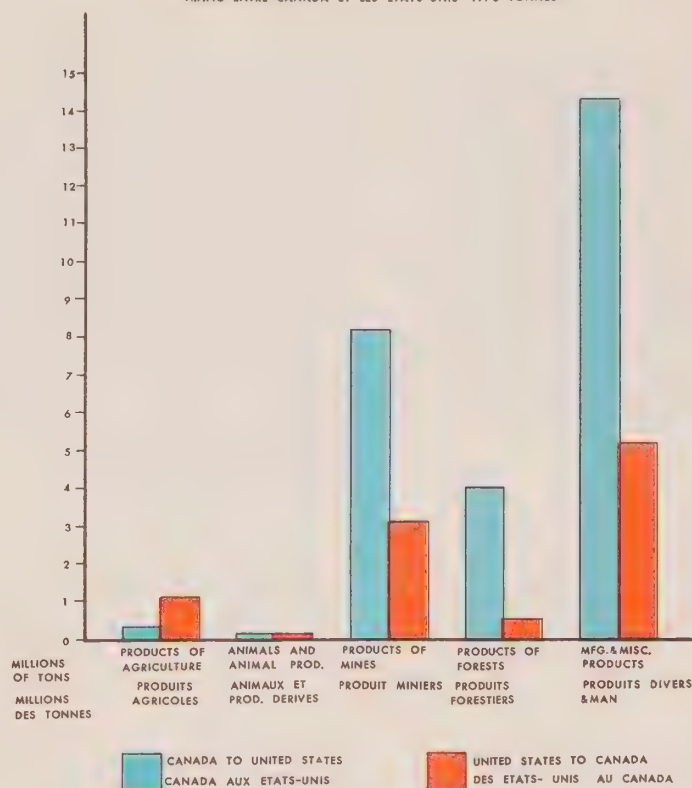

Si on prend 1973 comme exemple, ce document montre que le trafic provenant du Canada et à destination des États-Unis était de 26.7 millions de tonnes et valait 627.6 millions de dollars.

Le trafic provenant des États-Unis et terminé au Canada était de 9.8 millions de tonnes et valait 269.1 millions de dollars. En d'autres mots, il y avait 2.7 fois autant de trafic vers le sud que de trafic vers le nord et comprenant 2.3 fois le revenu.

Le trafic Canada-É.-U. est dominé par les trois groupes suivants de denrées; manufactures et divers, 53.4% du tonnage et 52.6% du revenu; les miniers 30.6% du tonnage et 24.1% du revenu; et les forestiers 14.8% du tonnage et 22.1% du revenu. Le trafic É.-U.-Canada, d'autre part, est dominé par les groupes suivants de denrées; manufactures et divers 52.7% du tonnage et 61.5% du revenu; les miniers 31.3% du tonnage et 14.6% du revenu; les agricoles 10.7% du tonnage et 17.5% du revenu.

On peut voir en regardant ces statistiques et le graphique n° 1, que le trafic vers le sud, à l'exception des agricoles, est en général beaucoup plus volumineux que le trafic vers le nord (manufactures et divers inclus) où la proportion du trafic vers le sud du trafic vers le nord est de 2.8 contre 1.

TRAFFIC BETWEEN CANADA & THE UNITED STATES-1973 TONS
 TRAFIC ENTRE CANADA ET LES ETATS-UNIS -1973 TONNES

This ratio, while still very high, has been decreasing slightly over the last few years. The 5.4% average annual increase of southbound Manufactured and Miscellaneous Products has been more than offset by the 7.3% average annual increase of northbound Manufactured and Miscellaneous Products. On the other hand, southbound Mine Products have been increasing at the rate of 8.0% per year while northbound Mine Products have actually been decreasing at the rate of 1.6% per year. The following chart lists the Average Annual Increases for all the Commodity Groupings for both tonnage and revenue in both directions.

AVERAGE ANNUAL INCREASES
 1968-1973

Commodity	Tonnage		Revenue	
	Southbound	Northbound	Southbound	Northbound
Products of Agriculture	7.9%	-3.1%	8.5%	3.9%
Animals & Animal Products	-9.0%	-7.0%	-11.7%	-5.4%
Products of Mines	8.0%	-1.6%	12.7%	6.9%
Products of Forests	4.0%	8.7%	9.9%	17.5%
Mfg. & Misc. Products	5.4%	7.3%	9.8%	13.4%
Total	5.9%	2.8%	10.1%	10.4%

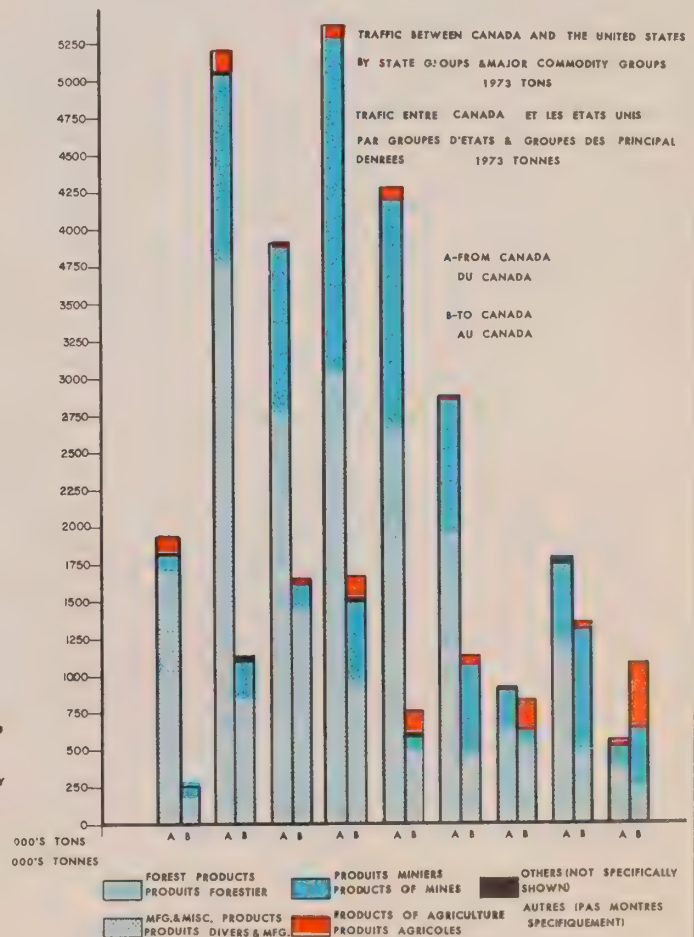

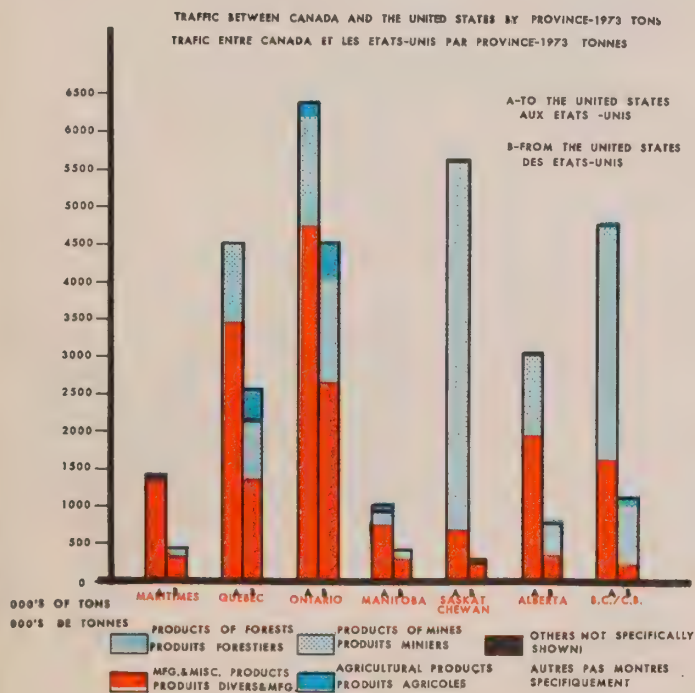

La proportion, même si elle reste toujours très élevée, diminue légèrement depuis quelques années. L'augmentation moyenne de 5.4% des produits manufactures et divers vers le sud a été contrariée par une augmentation moyenne annuelle de 7.3% des produits manufactures et divers vers le nord. Les produits miniers vers le sud, par contre, s'accroissent de 8% l'année pendant que les produits miniers vers le nord n'ont fait que diminuer d'un taux de 1.6% par année. Le graphique suivant montre les augmentations moyennes annuelles de tonnage et de revenu tous les deux, de tous les groupes de denrées dans les deux directions.

Augmentations Moyennes Annuelles
 1968-1973

Groupe de Marchandises	Tonnage		Revenu	
	vers le sud	vers le nord	vers le sud	vers le nord
Produits agricoles	7.9%	-3.1%	8.5%	3.9%
Animaux et produits dérivés	-9.0%	-7.0%	-11.7%	-5.4%
Produits miniers	8.0%	-1.6%	12.7%	6.9%
Produits forestiers	4.0%	8.7%	9.9%	17.5%
Manufacturés et produits divers	5.4%	7.3%	9.8%	13.4%
Total	5.9%	2.8%	10.1%	10.4%

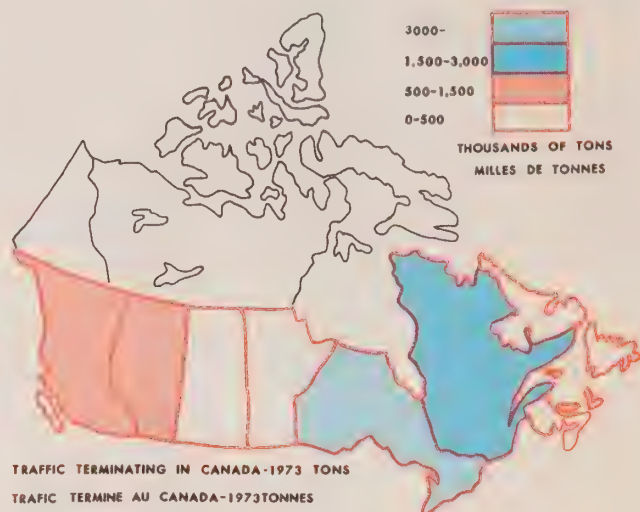

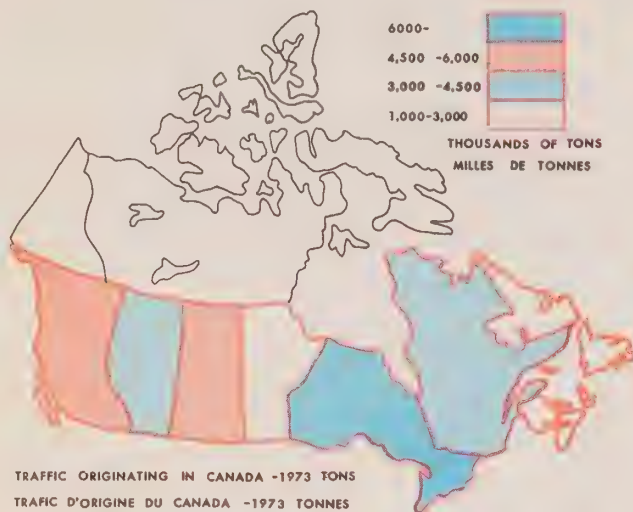

Graphs #2 and #3 illustrate the relative importing and exporting positions of each of the provinces and state groups in international revenue freight traffic. From a Canadian point of view, the largest exporting provinces are Ontario, Saskatchewan and British Columbia which are respectively the largest exporters of Manufactured and Miscellaneous Products, Products of Mines and Products of Forests. Ontario and Quebec receive 72% of the tonnage arriving in Canada the bulk of which is Manufactured and Miscellaneous Products. In the United States the largest importing areas are NC2, NE2, NC3 and NC1 respectively. In NE2 and NC1 the bulk of the imports is Manufactured and Miscellaneous Products while in NC2 and NC3, there is a high percentage of both Manufactured and Miscellaneous Products and Products of Mines. The largest exporting areas are NC2 and NC1 which ship primarily Manufactured and Miscellaneous Products and W1 which exports Products of Mines.

Les graphiques n°s 2 et 3 démontrent les rangs relatifs de chaque province et groupe d'états en exportation et en importation de trafic payant international. D'un point de vue canadien, les provinces qui sont à la tête sont l'Ontario, la Saskatchewan et la Colombie-Britannique qui exportent respectivement le plus de produits manufacturés et divers, miniers, et forestiers. L'Ontario et le Québec reçoivent 72% du tonnage à destination canadienne, dont la plupart se constitue de produits manufacturés et divers. Aux États-Unis, les régions les plus importantes en importation sont respectivement NC2, NE2, NC3 et NC1. En NE2 et NC1 les importations se font principalement en manufactures et divers pendant qu'en NC2 et en NC3, il y a un gros pourcentage de produits manufacturés et divers et produits miniers, tous les deux. Les régions les plus importantes en exportation sont NC2 et NC1 qui expédient principalement des produits manufacturés et divers et O1 qui expédie des produits miniers.

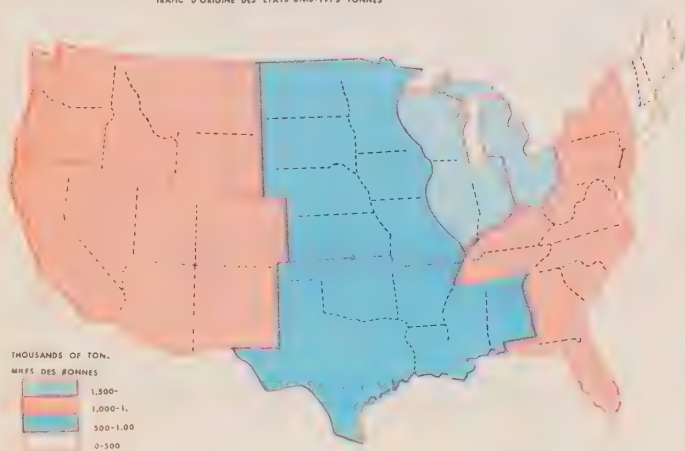

The import and export positions of the provinces and the state groups are further illustrated by the following diagrams.

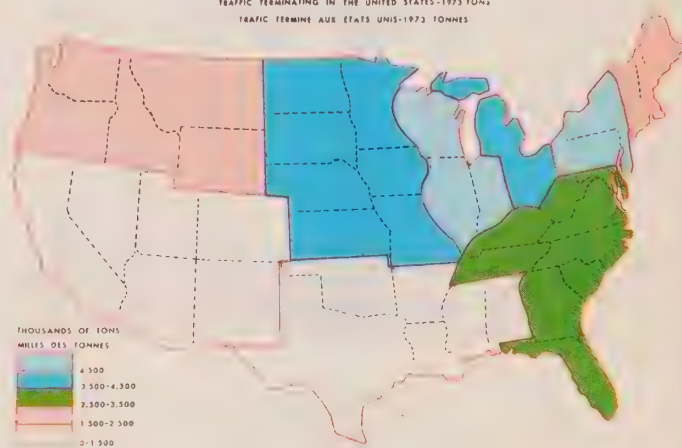

Les rangs des provinces et des groupes d'états en importations et en exportations sont également démontrés par les graphiques suivants:

TRAFFIC ORIGINATING IN THE UNITED STATES-1973 TONS
TRAFIC D'ORIGINE DES ETATS-UNIS-1973 TONNES

TRAFFIC TERMINATING IN THE UNITED STATES-1973 TONS
TRAFIC TERMINE AUX ETATS UNIS-1973 TONNES

In terms of revenue, this analysis shows that in 1973 the two major Canadian railways received 46% of the 628 million dollars received by them and connecting United States railways for the transport of goods from Canada to the United States and 34% of the 269 million dollars received by all such railways for the transport of goods from the United States to Canada. For most origin-destination pairs the Canadian percentage of the revenue will be less than the American percentage which can be partly explained by the proximity to the international border of the majority of the Canadian population and industry.

In general, this six-year analysis provides an overview of rail revenue freight traffic between Canadian provinces and our nine groupings of states (see Explanatory Introduction). It was not deemed feasible in terms of document size and publication costs to produce the statistics for each of the individual American states. However, should individual state information be required, the Traffic and Tariffs Branch can supply the data on a cost recovery basis.

Quant au revenu, cette analyse fait voir que les deux principaux chemins de fer canadiens ont reçu 46% de 628 millions de dollars reçu par ces mêmes entreprises et par les chemins de fer américains connexes pour le transport des produits du Canada aux États-Unis, et 34% des 269 millions de dollars touchés par ces mêmes entreprises ferroviaires pour le transport des produits des États-Unis au Canada. Pour la plupart des accouple-ments le pourcentage canadien n'équivaut pas le pourcentage américain, ce qui s'explique partiellement par la proximité de la frontière internationale.

En général, cette analyse de 6 ans, représente une vue d'ensemble du trafic ferroviaire payant entre les provinces canadiennes et les neuf groupes d'états (voir Avant-Propos). On n'a pu produire raisonnablement en tenant compte des coûts de publication et de largeur du document les statistiques de chaque état américain. La Direction d'Exploitation et de Tarifs peut, pourtant, si le besoin se présente, fournir des données pour les états individuels par la méthode du recouvrement de fonds.

Ian C. W. Spear,
Senior Transportation Analyst,
Traffic & Tariffs Branch

Ian C. W. Spear,
Premier analyste,
Direction de l'Exploitation et des Tarifs.

PREFACE

This document is published as Reference Paper No. 3.1, the first supplement to Reference Paper No. 3 of the Traffic & Tariffs Branch of the Canadian Transport Commission entitled "Commodity Flow Analysis, 1968-1973, Carload All-Rail Traffic Between Canada and the United States." These Reference Papers complement the Commodity Flow Analysis series for domestic rail traffic for the years 1968 to 1974, (Reference Papers Nos. 1, 1.1 and 1.2). When combined, these papers complete an analysis of Canadian carload all-rail traffic both domestic and international.

Since the inception of these Reference Papers, the information retrieval system has developed to the point where the Traffic & Tariffs Branch is currently prepared to supply, on request and at a cost recovery basis, details of traffic flows between Canadian provinces and American States for each of the 69 individual commodities listed in the Foreword.

The traffic movements represented by these Reports is gradually expanding and becoming more detailed. It is hoped that these Reference Papers will help to promote a better understanding of Canadian railway freight traffic and its influence on the Canadian economy.

J. Hanley,
Executive Director,
Traffic & Tariffs Branch,
Canadian Transport Commission.

PREFACE

Ce document est publié comme le document de référence n^o 3.1, le premier supplément au document de référence n^o 3 de la Direction de l'exploitation et des tarifs de la Commission canadienne des transports intitulé «Analyse du Volume des Denrées, 1968-1973, Trafic entièrement ferroviaire par wagons complets entre le Canada et les États-Unis.» Ces documents de référence complètent la série des analyses de volumes de denrées du trafic ferroviaire domestiques des années 1968 à 1974, (documents de référence n^o 1, 1.1 et 1.2). En combinaison, ces documents complètent un analyse du trafic canadien entièrement ferroviaire par wagon complet, national et international, tous les deux.

Depuis le commencement de ces documents de référence, le système de retrouver l'information a été développé au point où la Direction de l'exploitation et des tarifs s'apprête couramment à fournir sur demande et sur une base de recouvrement des fonds, des détails, des volumes entre les provinces canadiennes et les états américains pour chaque des 69 denrées individuelles enregistrées dans le Propos.

L'analyse des mouvements de trafic représentés par ces documents s'étend et se détaille d'avantage. Il est espéré que ces documents de référence ouvriront la voie à la promotion d'une meilleure compréhension du trafic canadien ferroviaire et de son influence sur l'économie canadienne.

J. Hanley,
Directeur exécutif,
Direction de l'exploitation et
des tarifs,
Commission canadienne des transports.

Foreword

The data set out in this Reference Paper No. 3.1 of the Traffic and Tariffs Branch of the Canadian Transport Commission was derived from the computer tape records of Canadian National Railways and CP Rail. The program for extraction of the data was designed and prescribed by the Traffic and Tariffs Branch. The resulting computer tapes were used to derive the 32 statistical tables contained in this Reference Paper.

The following types of movement were excluded from the program:

- a) Less-than-carload traffic;
- b) Express and non-carload traffic;
- c) Lake-and-rail and Rail-lake-and-rail carload movements;
- d) Container traffic;
- e) Piggyback Movements;
- f) Traffic originating (Canada to U.S.) and terminating (U.S. to Canada) on lines other than Canadian National and CP Rail;
- g) Freight carried on company service (O.C.S.).

This Reference Paper, therefore, consists of a one-year (1974) analysis of carload revenue freight traffic originating in Canada and terminating in the United States and traffic originating in the United States and terminating in Canada. This analysis includes import and export traffic from Canadian and American ports (i.e. to or from countries other than Canada and the United States) and also a small amount of traffic moving from an American origin to an American destination using Canadian railway lines on some segment of the movement. It is estimated that the data contained in this Reference Paper approximates 75% of the total revenue tonnage on all classes of railways for all types of traffic moving from Canada to the United States and 63% of the total revenue tonnage on all classes of railways for all types of traffic moving from the United States to Canada.

The commodity groupings used in this Reference Paper are as follows:

- a) Products of Agriculture
- b) Animals and Animal Products
- c) Products of Mines
- d) Products of Forests
- e) Manufactured and Miscellaneous Products

Avant-Propos

Les données qui renferme ce document de référence n° 3 de la Direction de l'exploitation et des tarifs de la Commission canadienne des transports ont été tirées des enregistrements mécanographiés des Chemins de fer Nationaux et du Canadien Pacifique. Le programme d'extraction des données a été conçu et préconisé par la Direction de l'exploitation et des tarifs. Les rubans ont servi à l'établissement des 32 tableaux de statistiques inclus dans ce document de référence.

Les classes suivantes des mouvements ont été exclues du programme:

- a) Trafic de détail;
- b) Messageries et chargements incomplets;
- c) Mouvements par wagons complets eau - rail et rail - eau - rail;
- d) Mouvements de containers;
- e) Remorques-rail-route;
- f) Trafic provenant du Canada à destination des États-Unis ou vice versa acheminé sur les lignes autres que celles des Chemins de fer Nationaux ou du Canadien Pacifique;
- g) Fret transporté pour les besoins de la société.

Ce document de référence, alors, comprend une analyse d'une année (1974) du trafic payant par wagons complets en provenance du Canada à destination des États-Unis et du trafic provenant des États-Unis à destination du Canada. Cette analyse inclue du trafic d'importation et d'exportation acheminé des ports canadiens et américains (c'est-à-dire, jusqu'aux ou en provenance des pays autres que le Canada et les États-Unis) et inclue également un certain volume du trafic acheminé d'une origine américaine à destination d'un endroit américain par des chemins de fer canadiens pour une partie du mouvement. On estime que les données incluses dans ce document de référence comprennent approximativement 73% du total du tonnage payant en provenance du Canada et à destination des États-Unis par toutes les classes de chemin de fer, et ce, pour tous types de mouvement. Elles représentant 63% du total du tonnage payant de tout genre de trafic acheminé par toutes les classes de chemin de fer des États-Unis jusqu'au Canada.

Les groupes de denrées qui renferme ce document de référence sont comme suit

- a) Produits agricoles
- b) Animaux et produits dérivés
- c) Produits miniers
- d) Produits forestiers
- e) Manufactures et produits divers

The major commodities in each group are:

PRODUCTS OF AGRICULTURE

Wheat
Other grain
Grain Products
Potatoes
Other vegetables, fresh and frozen
Fruits, fresh and frozen
Other agricultural products

ANIMALS & ANIMAL PRODUCTS

Livestock
Meats, fresh and frozen
Other meats, fish and packing house
products (edible)
Other animal products

PRODUCTS OF MINES

Coal
Potash
Sulphur
Iron ore and concentrates (incl. pellets)
Copper ores and concentrates
Copper-nickel ores and concentrates
Lead and zinc ores and concentrates
Other ores and concentrates
Alumina, bauxite and other aluminum ores
Sand, gravel and crushed stone
Gypsum, crude
Cement, natural and portland
Asbestos, crude
Phosphate rock
Salt
Other mine products
Coke

PRODUCTS OF FORESTS

Lumber
Plywood
Pulpwood
Pulpwood chips
Logs, poles and other forest products

MANUFACTURED & MISCELLANEOUS

Iron and steel - Primary and manufactured
Aluminum - Primary and manufactured
Copper - Primary and manufactured
Non-ferrous metals, n.e.s. - Primary and
manufactured
Scrap and waste metals
Machinery and parts
Passenger automobiles
Freight automobiles
Agricultural implements and parts
Other motor vehicles
Vehicle parts
Gasoline
Fuel Oil
Liquified petroleum gas
Other refined petroleum products
Sulphuric acid

Les denrées principales de chaque groupe sont:

PRODUITS AGRICOLES

Blé
Autres céréales
Produits céréaliers
Pommes de terre
Autres légumes frais et congelés
Fruits, frais et congelés
Autres produits agricoles

ANIMAUX ET PRODUITS DÉRIVÉS

Bétail
Viandes fraîches et congelées
Autres viandes, poissons et conserves
comestibles
Autres produits d'origine animale

PRODUITS MINIER

Charbon
Potasse
Soufre
Minerais et concentrés de fer (y compris
les boulettes)
Minerais et concentrés de cuivre
Minerais et concentrés de cuivre-nickel
Minerais et concentrés de plomb et de zinc
Autres minerais et concentrés
Alumine, bauxite et autres minerais
d'aluminium
Sable, gravier et pierre concassée
Gypse brut
Ciment naturel et Portland
Amiante brut
Phosphate en roche
Sel
Autres produits miniers
Coke

PRODUITS FORESTIERS

Bois de construction
Contre-plaqué

 Manufactured and miscellaneous goods
 Pool car traffic

Throughout the document, the data has been arranged in origin-destination matrices of provinces and states. The four Atlantic Provinces (New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland) have been considered as a single 'province' reducing the number of 'provinces' to seven as follows:

- | | |
|--------------|---------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Quebec | 6) Alberta |
| 3) Ontario | 7) British Columbia |
| 4) Manitoba | |

For the purposes of this document, the United States includes, with the exception of Hawaii, all states plus the District of Columbia. The states have been grouped into nine major groupings based on the U.S. Census Divisions and on our own examination of the traffic flow between Canada and the United States.

Northeast 1 (NE1)	Northeast 2 (NE2)
Maine	New York
New Hampshire	New Jersey
Vermont	Pennsylvania
Massachusetts	
Connecticut	
Rhode Island	
Northcentral 1 (NC1)	Northcentral 2 (NC2)
Michigan	Illinois
Ohio	Indiana
	Wisconsin
Northcentral 3 (NC3)	
Minnesota	
Iowa	
Missouri	
North Dakota	
South Dakota	
Nebraska	
Kansas	

Salignon (sulfate de soude)
 Gaz autres que de pétrole
 Autres produits chimiques et acides
 Pâte de bois
 Papier journal
 Carton, carton-pâte et carton-fibre
 Papier autres que le papier journal
 Conteneurs (autres que pour rail-route)
 Matériaux de construction
 Sucre
 Boissons
 Produits laitiers et autres produits alimentaires
 Aliments pour animaux et volaille
 Huiles végétales
 Produits en plastique et en cellulose
 Engrais (sauf la potasse)
 Produits ouverts et divers
 Trafic de marchandises en commun

Les données qui renferme ce document ont été présentées dans des matrices d'origine-destination des provinces et des états. Les quatre provinces maritimes (le Nouveau-Brunswick, La Nouvelle-Écosse, l'Île-du-Prince-Édouard et Terre-Neuve) ont été traitées comme une province unique, ce qui a réduit le nombre de «provinces» à sept comme suit:

- | | |
|--------------|-------------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Québec | 6) Alberta |
| 3) Ontario | 7) Colombie-Britannique |
| 4) Manitoba | |

Aux fins de ce document, les États-Unis comprennent (à l'exception de Hawaii) tous les états, et en plus, le District de la Colombie. Les états ont été rassemblés dans neuf groupes principaux qui sont fondés sur notre propre analyse et celle de U.S. Census Divisions des mouvements entre le Canada et les États-Unis.

AMERICAN ORIGINS AND DESTINATIONS
ORIGINES ET DESTINATIONS AMÉRICAINES

CANADIAN ORIGINS AND DESTINATIONS
ORIGINES ET DESTINATIONS CANADIENNES

The 32 statistical tables are grouped in five sections as follows:

- a) **Section 1** - 12 tables showing cars, tons, Canadian Revenue, American Revenue, ton-miles and car-miles to the international boundary in a province-state origin-destination matrix, by commodity groups. Both Canada to the United States and United States to Canada traffic are represented.
- b) **Section 2** - 8 tables showing average revenue per ton (total Canada and U.S.), average revenue per ton (Canadian portion), average length of haul (to international boundary) and average load per car in a province-state origin-destination matrix, by commodity groups. Traffic in both directions is represented.
- c) **Section 3** - 6 tables showing Canada originated traffic, Canada terminated traffic, United States originated traffic and United States terminated traffic, by commodity groups, in terms of cars, tons, Canadian revenue, American revenue, ton-miles and car-miles to the international boundary with a percentage distribution by commodity group.
- d) **Section 4** - 3 tables showing the distribution of Tonnage for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the ratio of Canada to U.S. Tonnage versus U.S. to Canada Tonnage for all commodity groups for each origin-destination pairing.
- e) **Section 5** - 3 tables showing the distribution of Total Revenue for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the Canadian percentage of the Total Revenue for each commodity group for each origin-destination pairing.

Les 32 tableaux de statistiques sont groupés en cinq sections comme suit:

- a) **Section 1** - 12 tableaux montrant wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à destination de la frontière internationale dans une matrice province-état origine-destination, par groupes de denrées. Le trafic du Canada aux États-Unis et celui des États-Unis au Canada sont tous les deux représentés.
- b) **Section 2** - 8 tableaux montrant le revenu moyen par tonne (total Canada et États-Unis), revenu moyen par tonne (portion canadienne), déplacement moyen (jusqu'à la frontière internationale) et chargement moyen par wagon dans une matrice province-état origine-destination, par groupes de denrées. Le trafic dans les deux directions est représenté.
- c) **Section 3** - 6 tableaux présentant le trafic provenant du Canada, le trafic terminé au Canada, le trafic provenant des États-Unis et le trafic terminé aux États-Unis, par groupes de denrées, en termes de wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à la frontière internationale avec un pourcentage de distribution par groupe de denrée.
- d) **Section 4** - 3 tableaux montrant la distribution du Tonnage pour le trafic acheminé du Canada aux États-Unis et le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi la proportion du Tonnage du Canada aux États-Unis contre le Tonnage des États-Unis au Canada pour tous les groupes de denrées pour chaque accouplement origine-destination.
- e) **Section 5** - 3 tableaux montrant la distribution de revenu total pour le trafic acheminé du Canada aux États-Unis et pour le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi le pourcentage canadien du revenu total pour chaque groupe de denrées pour chaque accouplement origine-destination.

Introduction

This document, Reference Paper No. 3.1, analyses 1974 carload revenue freight traffic originating in Canada and terminating in the United States and traffic originating in the United States and terminating in Canada and moving over the lines of Canadian National Railways and CP Rail.

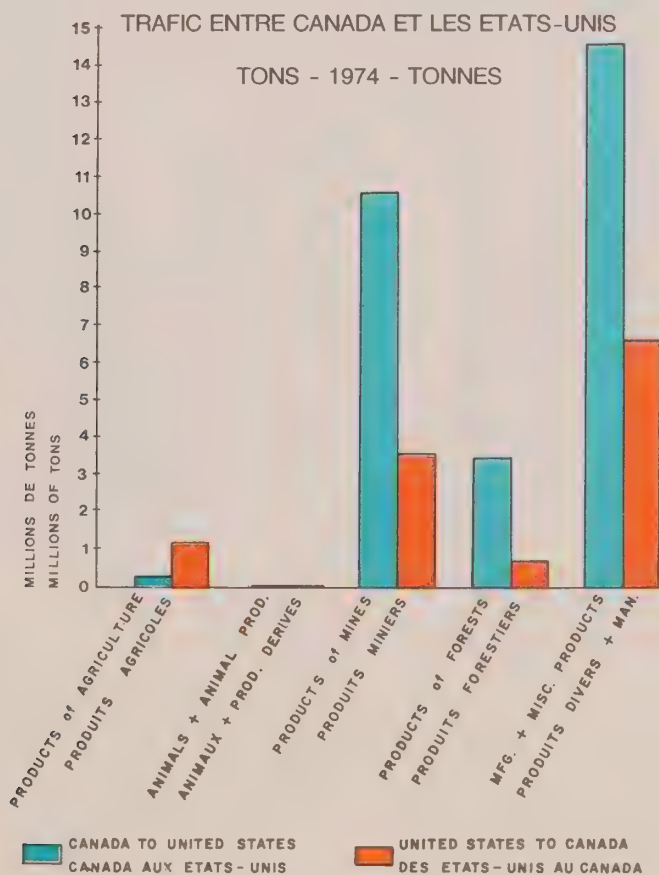

This paper shows that Canada to United States traffic via Canadian National Railways and CP Rail amounted to 29.1 million tons and 731.9 million dollars while United States to Canada traffic via the same two major railways totalled 12.2 million tons and 374.3 million dollars, or 2.4 times as much southbound tons as northbound tons and 2.0 times as much revenue. Southbound tonnage and revenue increased by 9.1% and 16.6% respectively over 1973 figures while northbound tonnage and revenue increased by 24.8% and 39.1% respectively.

Introduction

Ce papier, document de référence n° 3.1, est une analyse du trafic payant par wagons complets (1974) en provenance du Canada à destination des États-Unis et en provenance des États-Unis à destination du Canada et acheminé sur les voies des Chemins de fer Nationaux et du Canadien Pacifique.

Ce document montre que le trafic provenant du Canada à la destination des États-Unis était de 29.1 millions de tonnes et valait 731.9 millions de dollars. Le trafic provenant des États-Unis et terminé au Canada était de 12.2 millions de tonnes et valait 374.3 millions de dollars. En autres mots, il y avait 2.4 fois autant du trafic vers le sud que de trafic vers le nord et comprenant 2.0 fois le revenu. Le tonnage et le revenu pour le trafic vers le sud ont augmenté par 9.1% et 16.6% respectivement tandis que le tonnage et le revenu pour le trafic vers le nord ont augmenté par 24.8% et 39.1% respectivement.

TRAFFIC BETWEEN CANADA AND THE UNITED STATES

The Canada-U.S. traffic is dominated by the following three Commodity Groupings: Manufactured and Miscellaneous Products - 50.1% of the tonnage and 51.8% of the revenue; Mine Products - 36.5% of the tonnage and 29.3% of the revenue; and Forest Products - 12.1% of the tonnage and 17.9% of the revenue. The U.S.-Canada traffic, on the other hand, is dominated by the following Commodity Groupings; Manufactured and Miscellaneous Products - 54.6% of the tonnage and 62.0% of the revenue; Mine Products - 29.2% of the tonnage and 14.5% of the revenue; and Products of Agriculture - 9.8% of the tonnage and 15.3% of the revenue. It can be seen from these figures and from graph # 1 that with the exception of Products of Agriculture the southbound traffic is generally much greater than the northbound traffic including Manufactured and Miscellaneous Products where the ratio of southbound to northbound traffic is 2.2 to 1.

Le trafic Canada-E.U. est dominé par les trois groupes suivants de denrées; manufactures et divers - 50.1% du tonnage et 51.8% du revenu; les miniers - 36.5% du tonnage et 29.3% du revenu; et les forestiers - 12.1% du tonnage et 17.9% du revenu. Le trafic E.U.-Canada, d'autre part, est dominé par les groupes suivants de denrées; manufactures et divers - 54.6% du tonnage et 62.0% du revenu; les miniers - 29.2% du tonnage et 14.5% du tonnage; et les agricoles - 9.8% du tonnage et 15.3% du revenu. On peut voir en regardant ces statistiques et le graphique n° 1 que le trafic vers le sud, à l'exception des agricoles, est en général beaucoup plus volumineux que le trafic vers le nord, manufactures et divers inclus où la proportion du trafic vers le sud au trafic vers le nord est 2.2 contre 1.

Graphs #2 and #3 illustrate the relative importing and exporting positions of each of the provinces and state groups in international revenue freight traffic. From a Canadian point of view, the major exporting provinces are Saskatchewan exporting Mine Products and Ontario/Quebec exporting Manufactured and Miscellaneous Products. Ontario/Quebec receive 70% of the tonnage terminating in Canada the bulk of which is Manufactured and Miscellaneous Products. In the United States the largest importing areas are NC3, NE2 and NC2 respectively. All three import mainly Manufactured and Miscellaneous Products and Mine Products while NC3 is the largest importer of Forest Products. The largest exporting areas are NC2, NC1, NE2 and S1. The first three export mainly Manufactured and Miscellaneous Products while S1 exports mainly Products of Mines.

The import and export positions of the provinces and the state groups are further illustrated by the following diagrams.

Les graphiques n° 2 et 3 démontrent les rangs relatifs de chaque province et groupe d'états en exportation et en importation de trafic payant international. D'un point de vue canadien, les provinces qui sont à la tête sont Saskatchewan qui exporte le plus de produits miniers, et Ontario/Québec qui exportent le plus de produits manufacturés et divers. Ontario/Québec reçoivent 70% du tonnage à destination canadienne, dont la plupart se constitue de produits manufacturés et divers. Aux États-Unis les régions les plus importants en importation sont respectivement NC3, NE2, et NC2. Tous les trois importent pour la plupart les produits manufacturés et divers et les produits miniers tandis que NC3 est le plus grand importateur de produits forestiers. Les régions les plus importantes en exportation sont NC2, NC1, NE2 et S1. Les trois premiers exportent pour la plupart les produits manufacturés et divers tandis que S1 exporte les produits miniers.

Les rangs des provinces et des groupes d'états en importation et en exportations sont également démontrés par les graphiques suivants:

TONS - 1974 - TONNES

In terms of revenue, this analysis shows that in 1974 the two major Canadian railways received 47% or \$346 million of the \$732 million received by them and connecting United States railways for the transport of goods from Canada to the United States and 36% or \$134 million of the \$374 million received by all such railways for the transport of goods from the United States to Canada. For most origin-destination pairs the Canadian percentage of the revenue will be less than the American percentage which can be partly explained by the proximity to the international border of the majority of the Canadian population and industry.

In general, this analysis provides an overview of rail revenue freight traffic between Canadian provinces and nine groupings of American states. It was not deemed feasible in terms of document size and publication costs to produce the statistics for each of the American states and for each of the specific commodities listed in the Foreword. However, should individual state and/or commodity information be required, the Traffic and Tariffs Branch can supply the data on request on a cost recovery basis.

Quant au revenu, cette analyse fait voir que les deux principaux chemins de fer canadiens ont reçu 47% ou 346 millions de dollars de 732 millions de dollars reçu par ces mêmes entreprises et par les chemins de fer américains connexes pour le transport des produits du Canada aux États-Unis et 36% ou 134 millions de dollars de 374 millions de dollars touchés par ces mêmes entreprises ferroviaires pour le transport des produits des États-Unis au Canada. Pour la plupart des accouplements, le pourcentage canadien n'équivaut pas le pourcentage américain, ce qui explique partiellement par la proximité de la frontière internationale à la population et l'industrie canadienne.

En général, cette analyse représente une vue d'ensemble du trafic ferroviaire payant entre les provinces canadiennes et les neuf groupes d'états. On n'a pas pu produire raisonnablement en tenant compte des coûts de publication et de largeur du document les statistiques de chaque état américain et de chaque denrée individuelle enregistrée dans le Propos. La Direction d'exploitation et de tarifs peut, pourtant, si le besoin se présente, fournir des données pour les états individuels et/ou les denrées individuelles par la méthode du recouvrement de fonds.

SECTION 2 - 8 tables showing average revenue per ton (total Canada and U.S.), average revenue per ton (Canadian portion), average length of haul (to international boundary) and average load per car in a province-state origin-destination matrix by commodity groups. Traffic in both directions is represented.

SECTION 2 - 8 tableaux montrant le revenu moyen par tonne (total Canada et États-Unis), revenu moyen par tonne (portion canadienne), déplacement moyen (jusqu'à la frontière internationale) et chargement moyen par wagon dans une matrice province-état origine-destination par groupes de denrées. Le trafic dans les deux directions est représenté.

SECTION 3 - 6 tables showing Canada originated traffic, Canada terminated traffic, United States originated traffic, United States terminated traffic by commodity groups, in terms of cars, tons, Canadian revenue, American revenue, ton-miles and car-miles to the international boundary with a percentage distribution by commodity group.

SECTION 3 - 6 tableaux présentant le trafic provenant du Canada, le trafic terminé au Canada, le trafic provenant des États-Unis et le trafic terminé aux États-Unis par groupes de denrées en termes de wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à la frontière internationale avec un pourcentage de distribution par groupe de denrée.

SECTION 4 - 3 tables showing the distribution of tonnage for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the ratio of Canada to U.S. tonnage versus U.S. to Canada tonnage for all commodity groups for each origin-destination pairing.

SECTION 4 - 3 tableaux montrant la distribution du tonnage pour le trafic acheminé du Canada aux États-Unis et le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi la proportion du tonnage du Canada aux États-Unis contre le tonnage des États-Unis au Canada pour tous les groupes de denrées pour chaque accouplement origine-destination.

PREFACE

This document is published as Reference Paper No. 3.2, the second supplement to Reference Paper No. 3 of the Traffic & Tariffs Branch of the Canadian Transport Commission entitled "Commodity Flow Analysis, 1968-1973, Carload All-Rail Traffic Between Canada and the United States." These Reference Papers complement the Commodity Flow Analysis series for domestic rail traffic for the years 1968 to 1975, (Reference Papers Nos. 1 through 1.3). When combined, these papers complete an analysis of Canadian carload all-rail traffic both domestic and international.

Since the inception of these Reference Papers, the information retrieval system has developed to the point where the Traffic & Tariffs Branch is currently prepared to supply, on request and at a cost recovery basis, details of traffic flows between Canadian provinces and American States for each of the 69 individual commodities listed in the Foreword.

The traffic movements represented by these Reports is gradually expanding and becoming more detailed. It is hoped that these Reference Papers will help to promote a better understanding of Canadian railway freight traffic and its influence on the Canadian economy.

J. Hanley,
Executive Director,
Traffic & Tariffs Branch,
Canadian Transport Commission.

PREFACE

Ce document est publié comme le document de référence n^o 3.2, le deuxième supplément au document de référence n^o 3 de la Direction de l'exploitation et des tarifs de la Commission canadienne des transports intitulé «Analyse du Volume des Denrées, 1968-1973, Trafic entièrement ferroviaire par wagons complets entre le Canada et les États-Unis.» Ces documents de référence complètent la série des analyses de volumes de denrées du trafic ferroviaire domestiques des années 1968 à 1975, (documents de référence n^o 1 à 1.3). En combinaison, ces documents complètent un analyse du trafic canadien entièrement ferroviaire par wagon complet, national et international, tous les deux.

Depuis le commencement de ces documents de référence, le système de retrouver l'information a été développé au point où la Direction de l'exploitation et des tarifs s'apprête couramment à fournir sur demande et sur une base de recouvrement des fonds, des détails, des volumes entre les provinces canadiennes et les états américains pour chaque des 69 denrées individuelles enregistrées dans le Propos.

L'analyse des mouvements de trafic représentés par ces documents s'étend et se détaille d'avantage. Il est espéré que ces documents de référence ouvriront la voie à la promotion d'une meilleure compréhension du trafic canadien ferroviaire et de son influence sur l'économie canadienne.

J. Hanley,
Directeur exécutif,
Direction de l'exploitation et
des tarifs,
Commission canadienne des transports.

Commodity Flow Analysis
Carload All-Rail Traffic Between
Canada & the United States
1975

Analyse du Volume des Denrées
Trafic entièrement ferroviaire par wagons
complets entre le Canada et les États-Unis
1975

Foreword

The data set out in this Reference Paper No. 3.2 of the Traffic and Tariffs Branch of the Canadian Transport Commission was derived from the computer tape records of Canadian National Railways and CP Rail. The program for extraction of the data was designed and prescribed by the Traffic and Tariffs Branch. The resulting computer tapes were used to derive the 32 statistical tables contained in this Reference Paper.

The following types of movement were excluded from the program:

- a) Less-than-carload traffic;
- b) Express and non-carload traffic;
- c) Lake-and-rail and Rail-lake-and-rail carload movements;
- d) Container traffic;
- e) Piggyback Movements;
- f) Traffic originating (Canada to U.S.) and terminating (U.S. to Canada) on lines other than Canadian National and CP Rail;
- g) Freight carried on company service (O.C.S.).

This Reference Paper, therefore, consists of a one-year (1975) analysis of carload revenue freight traffic originating in Canada and terminating in the United States and traffic originating in the United States and terminating in Canada. This analysis includes import and export traffic from Canadian and American ports (i.e. to or from countries other than Canada and the United States) and also a small amount of traffic moving from an American origin to an American destination using Canadian railway lines on some segment of the movement. It is estimated that the data contained in this Reference Paper approximates 71% of the total revenue tonnage on all classes of railways for all types of traffic moving from Canada to the United States and 72% of the total revenue tonnage on all classes of railways for all types of traffic moving from the United States to Canada.

The commodity groupings used in this Reference Paper are as follows:

- a) Products of Agriculture
- b) Animals and Animal Products
- c) Products of Mines
- d) Products of Forests
- e) Manufactured and Miscellaneous Products

Avant-Propos

Les données qui renferme ce document de référence n° 3.2 de la Direction de l'exploitation et des tarifs de la Commission canadienne des transports ont été tirées des enregistrements mécanographiés des Chemins de fer Nationaux et du Canadien Pacifique. Le programme d'extraction des données a été conçu et préconisé par la Direction de l'exploitation et des tarifs. Les rubans ont servi à l'établissement des 32 tableaux de statistiques inclus dans ce document de référence.

Les classes suivantes des mouvements ont été exclues du programme:

- a) Trafic de détail;
- b) Messageries et chargements incomplets;
- c) Mouvements par wagons complets eau - rail et rail - eau - rail;
- d) Mouvements de containers;
- e) Remorques-rail-route;
- f) Trafic provenant du Canada à destination des États-Unis ou vice versa acheminé sur les lignes autres que celles des Chemins de fer Nationaux ou du Canadien Pacifique;
- g) Fret transporté pour les besoins de la société.

Ce document de référence, alors, comprend une analyse d'une année (1975) du trafic payant par wagons complets en provenance du Canada à destination des États-Unis et du trafic provenant des États-Unis à destination du Canada. Cette analyse inclue du trafic d'importation et d'exportation acheminé des ports canadiens et américains (c'est-à-dire, jusqu'aux ou en provenance des pays autres que le Canada et les États-Unis) et inclue également un certain volume du trafic acheminé d'une origine américaine à destination d'un endroit américain par des chemins de fer canadiens pour une partie du mouvement. On estime que les données incluses dans ce document de référence comprennent approximativement 71% du total du tonnage payant en provenance du Canada et à destination des États-Unis par toutes les classes de chemin de fer, et ce, pour tous types de mouvement. Elles représentant 72% du total du tonnage payant de tout genre de trafic acheminé par toutes les classes de chemin de fer des États-Unis jusqu'au Canada.

Les groupes de denrées qui renferme ce document de référence sont comme suit

- a) Produits agricoles
- b) Animaux et produits dérivés
- c) Produits miniers
- d) Produits forestiers
- e) Manufactures et produits divers

The major commodities in each group are:

PRODUCTS OF AGRICULTURE

Wheat
Other grain
Grain Products
Potatoes
Other vegetables, fresh and frozen
Fruits, fresh and frozen
Other agricultural products

ANIMALS & ANIMAL PRODUCTS

Livestock
Meats, fresh and frozen
Other meats, fish and packing house products (edible)
Other animal products

PRODUCTS OF MINES

Coal
Potash
Sulphur
Iron ore and concentrates (incl. pellets)
Copper ores and concentrates
Copper-nickel ores and concentrates
Lead and zinc ores and concentrates
Other ores and concentrates
Alumina, bauxite and other aluminum ores
Sand, gravel and crushed stone
Gypsum, crude
Cement, natural and portland
Asbestos, crude
Phosphate rock
Salt
Other mine products
Coke

PRODUCTS OF FORESTS

Lumber
Plywood
Pulpwood
Pulpwood chips
Logs, poles and other forest products

MANUFACTURED & MISCELLANEOUS

Iron and steel - Primary and manufactured
Aluminum - Primary and manufactured
Copper - Primary and manufactured
Non-ferrous metals, n.e.s. - Primary and manufactured
Scrap and waste metals
Machinery and parts
Passenger automobiles
Freight automobiles
Agricultural implements and parts
Other motor vehicles
Vehicle parts
Gasoline
Fuel Oil
Liquified petroleum gas
Other refined petroleum products
Sulphuric acid

Les denrées principales de chaque groupe sont:

PRODUITS AGRICOLES

Blé
Autres céréales
Produits céréaliers
Pommes de terre
Autres légumes frais et congelés
Fruits, frais et congelés
Autres produits agricoles

ANIMAUX ET PRODUITS DÉRIVÉS

Bétail
Viandes fraîches et congelées
Autres viandes, poissons et conserves comestibles
Autres produits d'origine animale

PRODUITS MINIER

Charbon
Potasse
Soufre
Minerais et concentrés de fer (y compris les boulettes)
Minerais et concentrés de cuivre
Minerais et concentrés de cuivre-nickel
Minerais et concentrés de plomb et de zinc
Autres minerais et concentrés
Alumine, bauxite et autres minerais d'aluminium
Sable, gravier et pierre concassée
Gypse brut
Ciment naturel et Portland
Amiante brut
Phosphate en roche
Sel
Autres produits miniers
Coke

PRODUITS FORESTIERS

Bois de construction
Contre-plaqué
Bois à pâte
Copeaux de bois à pâte
Billes, poteaux et autres produits forestiers

MANUFACTURES ET PRODUITS DIVERS

Fer et acier - primaires et ouvrés
Aluminium - primaire et ouvré
Cuivre - primaire et ouvré
Métaux non ferreux, n.d.s. - primaires et ouvrés
Débris de métaux
Machines et pièces
Voitures particulières
Véhicules utilitaires
Machines agricoles et pièces
Autres véhicules automobiles
Pièces de véhicules
Essence
Mazout
Gaz de pétrole liquéfiés
Autres dérivés raffinés du pétrole
Acide sulfurique

Salt cake (sodium sulphate)
 Gases other than petroleum
 Other chemicals and acids
 Woodpulp
 Newsprint paper
 Paperboard, pulpboard and fibreboard
 Paper other than newsprint
 Packaging containers (not C.O.F.C. containers)
 Building materials
 Sugar
 Beverages
 Dairy and other food products
 Animal and poultry feed
 Vegetable oils
 Plastic and cellulose products
 Fertilizers (excluding potash)
 Manufactured and miscellaneous goods
 Pool car traffic

Throughout the document, the data has been arranged in origin-destination matrices of provinces and states. The four Atlantic Provinces (New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland) have been considered as a single 'province' reducing the number of 'provinces' to seven as follows:

- | | |
|--------------|---------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Quebec | 6) Alberta |
| 3) Ontario | 7) British Columbia |
| 4) Manitoba | |

For the purposes of this document, the United States includes, with the exception of Hawaii, all states plus the District of Columbia. The states have been grouped into nine major groupings based on the U.S. Census Divisions and on our own examination of the traffic flow between Canada and the United States.

Northeast 1 (NE1)	Northeast 2 (NE2)
Maine	New York
New Hampshire	New Jersey
Vermont	Pennsylvania
Massachusetts	
Connecticut	
Rhode Island	
Northcentral 1 (NC1)	Northcentral 2 (NC2)
Michigan	Illinois
Ohio	Indiana
	Wisconsin
Northcentral 3 (NC3)	
Minnesota	
Iowa	
Missouri	
North Dakota	
South Dakota	
Nebraska	
Kansas	

Salignon (sulfate de soude)
 Gaz autres que de pétrole
 Autres produits chimiques et acides
 Pâte de bois
 Papier journal
 Carton, carton-pâte et carton-fibre
 Papier autres que le papier journal
 Conteneurs (autres que pour rail-route)
 Matériaux de construction
 Sucre
 Boissons
 Produits laitiers et autres produits alimentaires
 Aliments pour animaux et volaille
 Huiles végétales
 Produits en plastique et en cellulose
 Engrais (sauf la potasse)
 Produits ouvrés et divers
 Trafic de marchandises en commun

Les données qui renferme ce document ont été présentées dans des matrices d'origine-destination des provinces et des états. Les quatre provinces maritimes (le Nouveau-Brunswick, La Nouvelle-Écosse, l'Île-du-Prince-Édouard et Terre-Neuve) ont été traitées comme une province unique, ce qui a réduit le nombre de «provinces» à sept comme suit:

- | | |
|--------------|-------------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Québec | 6) Alberta |
| 3) Ontario | 7) Colombie-Britannique |
| 4) Manitoba | |

Aux fins de ce document, les États-Unis comprennent (à l'exception de Hawaii) tous les états, et en plus, le District de la Colombie. Les états ont été rassemblés dans neuf groupes principaux qui sont fondés sur notre propre analyse et celle de U.S. Census Divisions des mouvements entre le Canada et les États-Unis.

Nord Est 1 (NE1)	Nord Est 2 (NE2)
Maine	New York

AMERICAN ORIGINS AND DESTINATIONS ORIGINES ET DESTINATIONS AMÉRICAINES

CANADIAN ORIGINS AND DESTINATIONS

ORIGINES ET DESTINATIONS CANADIENNES

The 32 statistical tables are grouped in five sections as follows:

- a) **Section 1 - 12 tables** showing cars, tons, Canadian Revenue, American Revenue, ton-miles and car-miles to the international boundary in a province-state origin-destination matrix, by commodity groups. Both Canada to the United States and United States to Canada traffic are represented.
- b) **Section 2 - 8 tables** showing average revenue per ton (total Canada and U.S.), average revenue per ton (Canadian portion), average length of haul (to international boundary) and average load per car in a province-state origin-destination matrix, by commodity groups. Traffic in both directions is represented.
- c) **Section 3 - 6 tables** showing Canada originated traffic, Canada terminated traffic, United States originated traffic and United States terminated traffic, by commodity groups, in terms of cars, tons, Canadian revenue, American revenue, ton-miles and car-miles to the international boundary with a percentage distribution by commodity group.
- d) **Section 4 - 3 tables** showing the distribution of Tonnage for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the ratio of Canada to U.S. Tonnage versus U.S. to Canada Tonnage for all commodity groups for each origin-destination pairing.
- e) **Section 5 - 3 tables** showing the distribution of Total Revenue for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the Canadian percentage of the Total Revenue for each commodity group for each origin-destination pairing.

Les 32 tableaux de statistiques sont groupés en cinq sections comme suit:

- a) **Section 1 - 12 tableaux** montrant wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à destination de la frontière internationale dans une matrice province-état origine-destination, par groupes de denrées. Le trafic du Canada aux États-Unis et celui des États-Unis au Canada sont tous les deux représentés.
- b) **Section 2 - 8 tableaux** montrant le revenu moyen par tonne (total Canada et États-Unis), revenu moyen par tonne (portion canadienne), déplacement moyen (jusqu'à la frontière internationale) et chargement moyen par wagon dans une matrice province-état origine-destination, par groupes de denrées. Le trafic dans les deux directions est représenté.
- c) **Section 3 - 6 tableaux** présentant le trafic provenant du Canada, le trafic terminé au Canada, le trafic provenant des États-Unis et le trafic terminé aux États-Unis, par groupes de denrées, en termes de wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à la frontière internationale avec un pourcentage de distribution par groupe de denrée.
- d) **Section 4 - 3 tableaux** montrant la distribution du Tonnage pour le trafic acheminé du Canada aux États-Unis et le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi la proportion du Tonnage du Canada aux États-Unis contre le Tonnage des États-Unis au Canada pour tous les groupes de denrées pour chaque accouplement origine-destination.
- e) **Section 5 - 3 tableaux** montrant la distribution de revenu total pour le trafic acheminé du Canada aux États-Unis et pour le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi le pourcentage canadien du revenu total pour chaque groupe de denrées pour chaque accouplement origine-destination.

Commodity Flow Analysis
Carload All-Rail Traffic Between
Canada & the United States
1975

Analyse du Volume des Denrées
Trafic entièrement ferroviaire par wagons
complets entre le Canada et les États-Unis
1975

Introduction

Introduction

This document, Reference Paper No. 3.2, analyses 1975 carload revenue freight traffic originating in Canada and terminating in the United States and traffic originating in the United States and terminating in Canada and moving over the lines of Canadian National Railways and CP Rail.

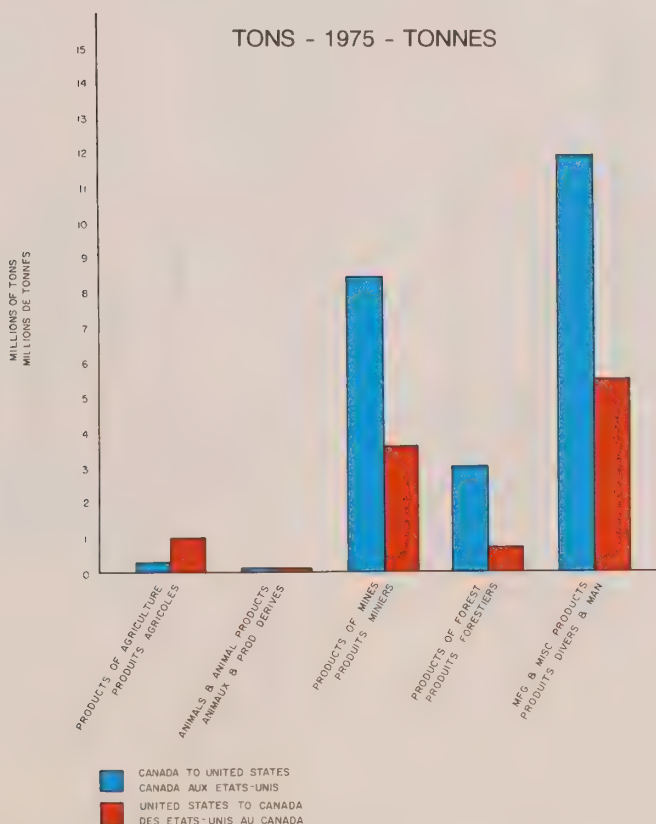

This paper shows that Canada to United States traffic via Canadian National Railways and CP Rail amounted to 23.8 million tons and 672.8 million dollars while United States to Canada traffic via the same two major railways totalled 11.0 million tons and 375.0 million dollars, or 2.1 times as much southbound tons as northbound tons and 1.8 times as much revenue. Southbound tonnage and revenue decreased by 18.4% and 8.9% respectively over 1974 figures while northbound tonnage decreased by 9.9% as revenue increased by 0.2%.

Ce papier, document de référence n° 3.2, est une analyse du trafic payant par wagons complets (1975) en provenance du Canada à destination des États-Unis et en provenance des États-Unis à destination du Canada et acheminé sur les voies des Chemins de fer Nationaux et du Canadien Pacifique.

Ce document montre que le trafic provenant du Canada à la destination des États-Unis était de 23.8 millions de tonnes et valait 672.8 millions de dollars. Le trafic provenant des États-Unis et terminé au Canada était de 11.0 millions de tonnes et valait 375.0 millions de dollars. En autres mots, il y avait 2.1 fois autant du trafic vers le sud que de trafic vers le nord et comprenant 1.8 fois le revenu. Le tonnage et le revenu pour le trafic vers le sud ont diminué par 18.4% et 8.9% respectivement tandis que le tonnage et le revenu pour le trafic vers le nord ont diminué par 9.9% et augmenté par 0.2% respectivement.

TRAFFIC BETWEEN CANADA AND THE UNITED STATES

TRAFIC ENTRE CANADA ET LES ETATS-UNIS

The Canada-U.S. traffic is dominated by the following three Commodity Groupings: Manufactured and Miscellaneous Products - 50.1% of the tonnage and 52.0% of the revenue; Mine Products - 35.5% of the tonnage and 28.5% of the revenue; and Forest Products - 12.7% of the tonnage and 17.9% of the revenue. The U.S.-Canada traffic, on the other hand, is dominated by the following Commodity Groupings; Manufactured and Miscellaneous Products - 50.3% of the tonnage and 59.4% of the revenue; Mine Products - 32.7% of the tonnage and 15.7% of the revenue; and Products of Agriculture - 9.5% of the tonnage and 15.7% of the revenue. It can be seen from these figures and from graph # 1 that with the exception of Products of Agriculture the southbound traffic is generally much greater than the northbound traffic including Manufactured and Miscellaneous Products where the ratio of southbound to northbound traffic is 2.2 to 1.

Le trafic Canada-E.U. est dominé par les trois groupes suivants de denrées; manufactures et divers - 50.1% du tonnage et 52.0% du revenu; les miniers - 35.5% du tonnage et 28.5% du revenu; et les forestiers - 12.7% du tonnage et 17.9% du revenu. Le trafic E.U.-Canada, d'autre part, est dominé par les groupes suivants de denrées; manufactures et divers - 50.3% du tonnage et 59.4% du revenu; les miniers - 32.7% du tonnage et 15.7% du revenu; et les agricoles - 9.5% du tonnage et 15.7% du revenu. On peut voir en regardant ces statistiques et le graphique n° 1 que le trafic vers le sud, à l'exception des agricoles, est en général beaucoup plus volumineux que le trafic vers le nord, manufactures et divers inclus où la proportion du trafic vers le sud au trafic vers le nord est 2.2 contre 1.

Graphs #2 and #3 illustrate the relative importing and exporting positions of each of the provinces and state groups in international revenue freight traffic. From a Canadian point of view, the major exporting provinces are Saskatchewan exporting Mine Products and Ontario/Quebec exporting Manufactured and Miscellaneous Products. Ontario/Quebec receive 70% of the tonnage terminating in Canada the bulk of which is Manufactured and Miscellaneous Products. In the United States the largest importing areas are NC2, NE2 and NC3 respectively. All three import mainly Manufactured and Miscellaneous Products and Mine Products while NC3 is the largest importer of Forest Products. The largest exporting areas are W1, NC1, NC2 and S1. The first three export mainly Manufactured and Miscellaneous Products while S1 exports mainly Products of Mines.

The import and export positions of the provinces and the state groups are further illustrated by the following diagrams.

Les graphiques n° 2 et 3 démontrent les rangs relatifs de chaque province et groupe d'états en exportation et en importation de trafic payant international. D'un point de vue canadien, les provinces qui sont à la tête sont Saskatchewan qui exporte le plus de produits miniers, et Ontario/Québec qui exportent le plus de produits manufacturés et divers. Ontario/Québec reçoivent 70% du tonnage à destination canadienne, dont la plupart se constitue de produits manufacturés et divers. Aux États-Unis les régions les plus importants en importation sont respectivement NC2, NE2, et NC3. Tous les trois importent pour la plupart les produits manufacturés et divers et les produits miniers tandis que NC3 est le plus grand importateur de produits forestiers. Les régions les plus importantes en exportation sont W1, NC1, NC2 et S1. Les trois premiers exportent pour la plupart les produits manufacturés et divers tandis que S1 exporte les produits miniers.

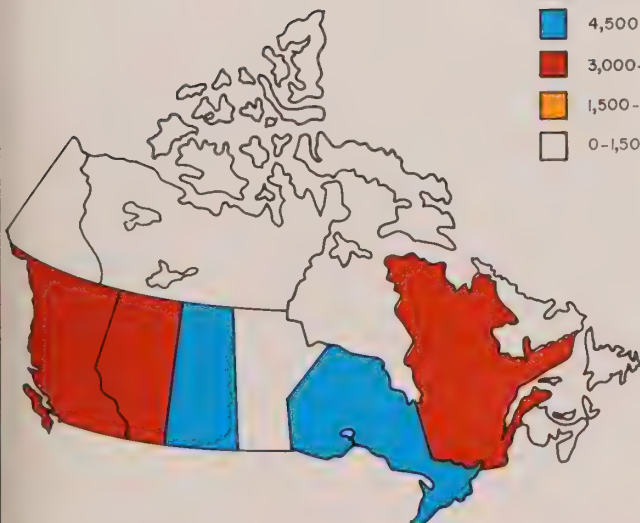

Les rangs des provinces et des groupes d'états en importation et en exportations sont également démontrés par les graphiques suivants:

TONS - 1975 - TONNES

In terms of revenue, this analysis shows that in 1975 the two major Canadian railways received 47% or \$316 million of the \$673 million received by them and connecting United States railways for the transport of goods from Canada to the United States and 36% or \$133 million of the \$375 million received by all such railways for the transport of goods from the United States to Canada. For most origin-destination pairs the Canadian percentage of the revenue will be less than the American percentage which can be partly explained by the proximity to the international border of the majority of the Canadian population and industry.

In general, this analysis provides an overview of rail revenue freight traffic between Canadian provinces and nine groupings of American states. It was not deemed feasible in terms of document size and publication costs to produce the statistics for each of the American states and for each of the specific commodities listed in the Foreword. However, should individual state and/or commodity information be required, the Traffic and Tariffs Branch can supply the data on request on a cost recovery basis.

Quant au revenu, cette analyse fait voir que les deux principaux chemins de fer canadiens ont reçu 47% ou 316 millions de dollars de 673 millions de dollars reçu par ces mêmes entreprises et par les chemins de fer américains connexes pour le transport des produits du Canada aux États-Unis et 36% ou 133 millions de dollars de 375 millions de dollars touchés par ces mêmes entreprises ferroviaires pour le transport des produits des États-Unis au Canada. Pour la plupart des accouplements, le pourcentage canadien n'équivaut pas le pourcentage américain, ce qui explique partiellement par la proximité de la frontière internationale à la population et l'industrie canadienne.

En général, cette analyse représente une vue d'ensemble du trafic ferroviaire payant entre les provinces canadiennes et les neuf groupes d'états. On n'a pas pu produire raisonnablement en tenant compte des coûts de publication et de largeur du document les statistiques de chaque état américain et de chaque denrée individuelle enregistrée dans le Propos. La Direction d'exploitation et de tarifs peut, pourtant, si le besoin se présente, fournir des données pour les états individuels et/ou les denrées individuelles par la méthode du recouvrement de fonds.

SECTION 2 - 8 tables showing average revenue per ton (total Canada and U.S.), average revenue per ton (Canadian portion), average length of haul (to international boundary) and average load per car in a province-state origin-destination matrix by commodity groups. Traffic in both directions is represented.

SECTION 2 - 8 tableaux montrant le revenu moyen par tonne (total Canada et États-Unis), revenu moyen par tonne (portion canadienne), déplacement moyen (jusqu'à la frontière internationale) et chargement moyen par wagon dans une matrice province-état origine-destination par groupes de denrées. Le trafic dans les deux directions est représenté.

SECTION 3 - 6 tables showing Canada originated traffic, Canada terminated traffic, United States originated traffic, United States terminated traffic by commodity groups, in terms of cars, tons, Canadian revenue, American revenue, ton-miles and car-miles to the international boundary with a percentage distribution by commodity group.

SECTION 3 - 6 tableaux présentant le trafic provenant du Canada, le trafic terminé au Canada, le trafic provenant des États-Unis et le trafic terminé aux États-Unis par groupes de denrées en termes de wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à la frontière internationale avec un pourcentage de distribution par groupe de denrée.

SECTION 4 - 3 tables showing the distribution of tonnage for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the ratio of Canada to U.S. tonnage versus U.S. to Canada tonnage for all commodity groups for each origin-destination pairing.

SECTION 4 - 3 tableaux montrant la distribution du tonnage pour le trafic acheminé du Canada aux États-Unis et le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi la proportion du tonnage du Canada aux États-Unis contre le tonnage des États-Unis au Canada pour tous les groupes de denrées pour chaque accouplement origine-destination.

PREFACE

This document is published as Reference Paper No. 3.3, the third supplement to Reference Paper No. 3 of the Traffic & Tariffs Branch of the Canadian Transport Commission entitled "Commodity Flow Analysis, 1968-1973, Carload All-Rail Traffic Between Canada and the United States." These Reference Papers complement the Commodity Flow Analysis series for domestic rail traffic for the years 1968 to 1976, (Reference Papers Nos. 1 through 1.4). When combined, these papers complete an analysis of Canadian carload all-rail traffic both domestic and international.

Since the inception of these Reference Papers, the information retrieval system has developed to the point where the Traffic & Tariffs Branch is currently prepared to supply, on request and at a cost recovery basis, details of traffic flows between Canadian provinces and American States for each of the 69 individual commodities listed in the Foreword.

The traffic movements represented by these Reports is gradually expanding and becoming more detailed. It is hoped that these Reference Papers will help to promote a better understanding of Canadian railway freight traffic and its influence on the Canadian economy.

J. Hanley,
Executive Director,
Traffic & Tariffs Branch,
Canadian Transport Commission.

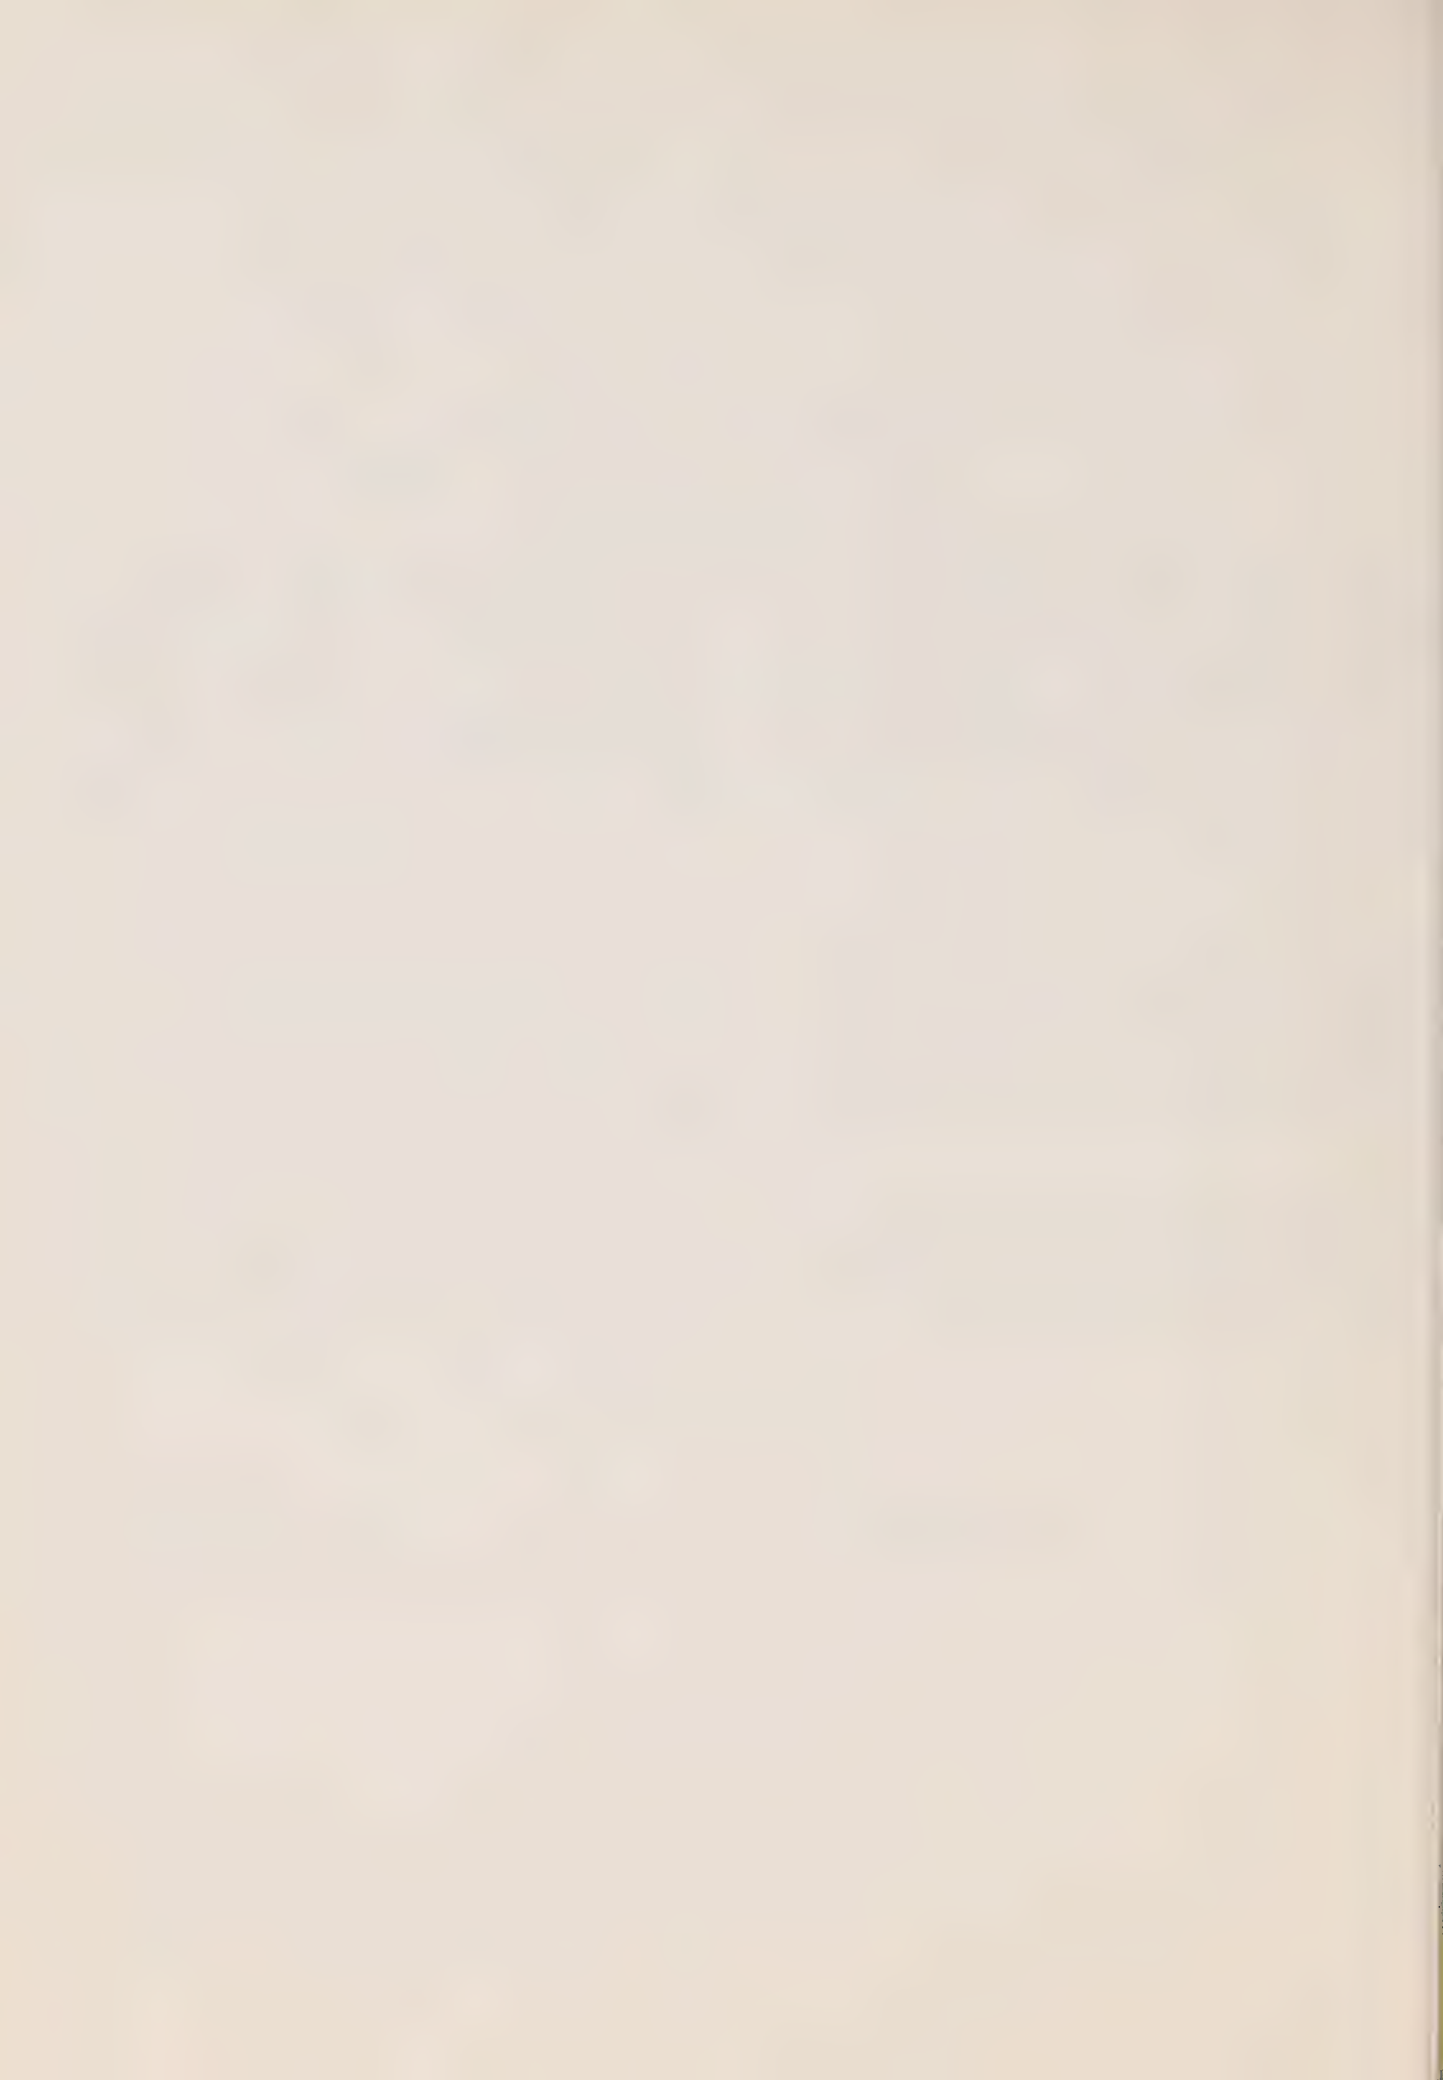

PREFACE

Ce document est publié comme le document de référence n^o 3.3, le troisième supplément au document de référence n^o 3 de la Direction de l'exploitation et des tarifs de la Commission canadienne des transports intitulé «Analyse du Volume des Denrées, 1968-1973, Trafic entièrement ferroviaire par wagons complets entre le Canada et les États-Unis.» Ces documents de référence complètent la série des analyses de volumes de denrées du trafic ferroviaire domestiques des années 1968 à 1976, (documents de référence n^o 1 à 1.4). En combinaison, ces documents complètent un analyse du trafic canadien entièrement ferroviaire par wagon complet, national et international, tous les deux.

Depuis le commencement de ces documents de référence, le système de retrouver l'information a été développé au point où la Direction de l'exploitation et des tarifs s'apprête couramment à fournir sur demande et sur une base de recouvrement des fonds, des détails, des volumes entre les provinces canadiennes et les états américains pour chaque des 69 denrées individuelles enregistrées dans le Propos.

L'analyse des mouvements de trafic représentés par ces documents s'étend et se détaille d'avantage. Il est espéré que ces documents de référence ouvriront la voie à la promotion d'une meilleure compréhension du trafic canadien ferroviaire et de son influence sur l'économie canadienne.

J. Hanley,
Directeur exécutif,
Direction de l'exploitation et
des tarifs,
Commission canadienne des transports.

Foreword

Avant-Propos

The data set out in this Reference Paper No. 3.3 of the Traffic and Tariffs Branch of the Canadian Transport Commission was derived from the computer tape records of Canadian National Railways and CP Rail. The program for extraction of the data was designed and prescribed by the Traffic and Tariffs Branch. The resulting computer tapes were used to derive the 32 statistical tables contained in this Reference Paper.

The following types of movement were excluded from the program:

- a) Less-than-carload traffic;
- b) Express and non-carload traffic;
- c) Lake-and-rail and Rail-lake-and-rail carload movements;
- d) Container traffic;
- e) Piggyback Movements;
- f) Traffic originating (Canada to U.S.) and terminating (U.S. to Canada) on lines other than Canadian National and CP Rail;
- g) Freight carried on company service (O.C.S.).

This Reference Paper, therefore, consists of a one-year (1976) analysis of carload revenue freight traffic originating in Canada and terminating in the United States and traffic originating in the United States and terminating in Canada. This analysis includes import and export traffic from Canadian and American ports (i.e. to or from countries other than Canada and the United States) and also a small amount of traffic moving from an American origin to an American destination using Canadian railway lines on some segment of the movement. It is estimated that the data contained in this Reference Paper approximates 85%* of the total revenue tonnage on all classes of railways for all types of traffic moving from Canada to the United States and 63% of the total revenue tonnage on all classes of railways for all types of traffic moving from the United States to Canada.

The commodity groupings used in this Reference Paper are as follows:

- a) Products of Agriculture
- b) Animals and Animal Products
- c) Products of Mines
- d) Products of Forests
- e) Manufactured and Miscellaneous Products

Les données qui renferme ce document de référence n° 3.3 de la Direction de l'exploitation et des tarifs de la Commission canadienne des transports ont été tirées des enregistrements mécanographiés des Chemins de fer Nationaux et du Canadien Pacifique. Le programme d'extraction des données a été conçu et préconisé par la Direction de l'exploitation et des tarifs. Les rubans ont servi à l'établissement des 32 tableaux de statistiques inclus dans ce document de référence.

Les classes suivantes des mouvements ont été exclues du programme:

- a) Trafic de détail;
- b) Messageries et chargements incomplets;
- c) Mouvements par wagons complets eau - rail et rail - eau - rail;
- d) Mouvements de containers;
- e) Remorques-rail-route;
- f) Trafic provenant du Canada à destination des États-Unis ou vice versa acheminé sur les lignes autres que celles des Chemins de fer Nationaux ou du Canadien Pacifique;
- g) Fret transporté pour les besoins de la société.

Ce document de référence, alors, comprend une analyse d'une année (1976) du trafic payant par wagons complets en provenance du Canada à destination des États-Unis et du trafic provenant des États-Unis à destination du Canada. Cette analyse inclue du trafic d'importation et d'exportation acheminé des ports canadiens et américains (c'est-à-dire, jusqu'aux ou en provenance des pays autres que le Canada et les États-Unis) et inclue également un certain volume du trafic acheminé d'une origine américaine à destination d'un endroit américain par des chemins de fer canadiens pour une partie du mouvement. On estime que les données incluses dans ce document de référence comprennent approximativement 85%* du total du tonnage payant en provenance du Canada et à destination des États-Unis par toutes les classes de chemin de fer, et ce, pour tous types de mouvement. Elles représentant 63% du total du tonnage payant de tout genre de trafic acheminé par toutes les classes de chemin de fer des États-Unis jusqu'au Canada.

Les groupes de denrées qui renferme ce document de référence sont comme suit

- a) Produits agricoles
- b) Animaux et produits dérivés
- c) Produits miniers
- d) Produits forestiers
- e) Manufactures et produits divers

The major commodities in each group are:

PRODUCTS OF AGRICULTURE

Wheat
Other grain
Grain Products
Potatoes
Other vegetables, fresh and frozen
Fruits, fresh and frozen
Other agricultural products

ANIMALS & ANIMAL PRODUCTS

Livestock
Meats, fresh and frozen
Other meats, fish and packing house
products (edible)
Other animal products

PRODUCTS OF MINES

Coal
Potash
Sulphur
Iron ore and concentrates (incl. pellets)
Copper ores and concentrates
Copper-nickel ores and concentrates
Lead and zinc ores and concentrates
Other ores and concentrates
Alumina, bauxite and other aluminum ores
Sand, gravel and crushed stone
Gypsum, crude
Cement, natural and portland
Asbestos, crude
Phosphate rock
Salt
Other mine products
Coke

PRODUCTS OF FORESTS

Lumber
Plywood
Pulpwood
Pulpwood chips
Logs, poles and other forest products

MANUFACTURED & MISCELLANEOUS

Iron and steel - Primary and manufactured
Aluminum - Primary and manufactured
Copper - Primary and manufactured
Non-ferrous metals, n.e.s. - Primary and
manufactured
Scrap and waste metals
Machinery and parts
Passenger automobiles
Freight automobiles
Agricultural implements and parts
Other motor vehicles
Vehicle parts
Gasoline
Fuel Oil
Liquified petroleum gas
Other refined petroleum products
Sulphuric acid

Les denrées principales de chaque groupe sont:

PRODUITS AGRICOLES

Blé
Autres céréales
Produits céréaliers
Pommes de terre
Autres légumes frais et congelés
Fruits, frais et congelés
Autres produits agricoles

ANIMAUX ET PRODUITS DÉRIVÉS

Bétail
Viandes fraîches et congelées
Autres viandes, poissons et conserves
comestibles
Autres produits d'origine animale

PRODUITS MINIER

Charbon
Potasse
Soufre
Minerais et concentrés de fer (y compris
les boulettes)
Minerais et concentrés de cuivre
Minerais et concentrés de cuivre-nickel
Minerais et concentrés de plomb et de zinc
Autres minerais et concentrés
Alumine, bauxite et autres minerais
d'aluminium
Sable, gravier et pierre concassée
Gypse brut
Ciment naturel et Portland
Amiante brut
Phosphate en roche
Sel
Autres produits miniers
Coke

PRODUITS FORESTIERS

Bois de construction
Contre-plaqué
Bois à pâte
Copeaux de bois à pâte
Billes, poteaux et autres produits
forestiers

MANUFACTURES ET PRODUITS DIVERS

Fer et acier - primaires et ouvrés
Aluminium - primaire et ouvré
Cuivre - primaire et ouvré
Métaux non ferreux, n.d.s. - primaires et
ouvrés
Débris de métaux
Machines et pièces
Voitures particulières
Véhicules utilitaires
Machines agricoles et pièces
Autres véhicules automobiles
Pièces de véhicules
Essence
Mazout
Gaz de pétrole liquéfiés
Autres dérivés raffinés du pétrole
Acide sulfurique

Salt cake (sodium sulphate)
 Gases other than petroleum
 Other chemicals and acids
 Woodpulp
 Newsprint paper
 Paperboard, pulpboard and fibreboard
 Paper other than newsprint
 Packaging containers (not C.O.F.C. containers)
 Building materials
 Sugar
 Beverages
 Dairy and other food products
 Animal and poultry feed
 Vegetable oils
 Plastic and cellulose products
 Fertilizers (excluding potash)
 Manufactured and miscellaneous goods
 Pool car traffic

Throughout the document, the data has been arranged in origin-destination matrices of provinces and states. The four Atlantic Provinces (New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland) have been considered as a single 'province' reducing the number of 'provinces' to seven as follows:

- | | |
|--------------|---------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Quebec | 6) Alberta |
| 3) Ontario | 7) British Columbia |
| 4) Manitoba | |

For the purposes of this document, the United States includes, with the exception of Hawaii, all states plus the District of Columbia. The states have been grouped into nine major groupings based on the U.S. Census Divisions and on our own examination of the traffic flow between Canada and the United States.

Northeast 1 (NE1)

Maine
 New Hampshire
 Vermont
 Massachusetts
 Connecticut
 Rhode Island

Northeast 2 (NE2)

New York
 New Jersey
 Pennsylvania

Northcentral 1 (NC1)

Michigan
 Ohio

Northcentral 2 (NC2)

Illinois
 Indiana
 Wisconsin

Northcentral 3 (NC3)

Minnesota
 Iowa
 Missouri
 North Dakota
 South Dakota
 Nebraska
 Kansas

Salignon (sulfate de soude)
 Gaz autres que de pétrole
 Autres produits chimiques et acides
 Pâte de bois
 Papier journal
 Carton, carton-pâte et carton-fibre
 Papier autres que le papier journal
 Conteneurs (autres que pour rail-route)
 Matériaux de construction
 Sucre
 Boissons
 Produits laitiers et autres produits alimentaires
 Aliments pour animaux et volaille
 Huiles végétales
 Produits en plastique et en cellulose
 Engrais (sauf la potasse)
 Produits ouverts et divers
 Trafic de marchandises en commun

Les données qui renferme ce document ont été présentées dans des matrices d'origine-destination des provinces et des états. Les quatre provinces maritimes (le Nouveau-Brunswick, La Nouvelle-Écosse, l'Île-du-Prince-Édouard et Terre-Neuve) ont été traitées comme une province unique, ce qui a réduit le nombre de «provinces» à sept comme suit:

- | | |
|--------------|-------------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Québec | 6) Alberta |
| 3) Ontario | 7) Colombie-Britannique |
| 4) Manitoba | |

Aux fins de ce document, les États-Unis comprennent (à l'exception de Hawaii) tous les états, et en plus, le District de la Colombie. Les états ont été rassemblés dans neuf groupes principaux qui sont fondés sur notre propre analyse et celle de U.S. Census Divisions des mouvements entre le Canada et les États-Unis.

Nord Est 1 (NE1)

Maine
 New Hampshire
 Vermont
 Massachusetts

AMERICAN ORIGINS AND DESTINATIONS

ORIGINES ET DESTINATIONS AMERICAINES

CANADIAN ORIGINS AND DESTINATIONS

ORIGINES ET DESTINATIONS CANADIENNES

The 32 statistical tables are grouped in five sections as follows:

- a) **Section 1 - 12 tables showing cars, tons, Canadian Revenue, American Revenue, ton-miles and car-miles to the international boundary in a province-state origin-destination matrix, by commodity groups. Both Canada to the United States and United States to Canada traffic are represented.**
- b) **Section 2 - 8 tables showing average revenue per ton (total Canada and U.S.), average revenue per ton (Canadian portion), average length of haul (to international boundary) and average load per car in a province-state origin-destination matrix, by commodity groups. Traffic in both directions is represented.**
- c) **Section 3 - 6 tables showing Canada originated traffic, Canada terminated traffic, United States originated traffic and United States terminated traffic, by commodity groups, in terms of cars, tons, Canadian revenue, American revenue, ton-miles and car-miles to the international boundary with a percentage distribution by commodity group.**
- d) **Section 4 - 3 tables showing the distribution of Tonnage for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the ratio of Canada to U.S. Tonnage versus U.S. to Canada Tonnage for all commodity groups for each origin-destination pairing.**
- e) **Section 5 - 3 tables showing the distribution of Total Revenue for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the Canadian percentage of the Total Revenue for each commodity group for each origin-destination pairing.**

***NOTE:**

The calculation of this figure (percentage of total south-bound traffic represented by this document) was altered in 1976 to exclude traffic received from U.S. rail connections destined to U.S. rail connections (overhead traffic) from the figure used for all classes of railways for all types of revenue freight traffic moving from Canada to the United States. The following table shows the percentage of southbound traffic represented by this document using both methods of calculation for the years 1974 to present.

YEAR/ANNEE	OVERHEAD INCLUDED INTERMEDIAIRE INCLUS	OVERHEAD EXCLUDED INTERMEDIAIRE EXCLUS
1976	71%	85%
1975	71%	86%
1974	75%	92%

Les 32 tableaux de statistiques sont groupés en cinq sections comme suit:

- a) **Section 1 - 12 tableaux montrant wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à destination de la frontière internationale dans une matrice province-état origine-destination, par groupes de denrées. Le trafic du Canada aux États-Unis et celui des États-Unis au Canada sont tous les deux représentés.**
- b) **Section 2 - 8 tableaux montrant le revenu moyen par tonne (total Canada et États-Unis), revenu moyen par tonne (portion canadienne), déplacement moyen (jusqu'à la frontière internationale) et chargement moyen par wagon dans une matrice province-état origine-destination, par groupes de denrées. Le trafic dans les deux directions est représenté.**
- c) **Section 3 - 6 tableaux présentant le trafic provenant du Canada, le trafic terminé au Canada, le trafic provenant des États-Unis et le trafic terminé aux États-Unis, par groupes de denrées, en termes de wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à la frontière internationale avec un pourcentage de distribution par groupe de denrée.**
- d) **Section 4 - 3 tableaux montrant la distribution du Tonnage pour le trafic acheminé du Canada aux États-Unis et le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi la proportion du Tonnage du Canada aux États-Unis contre le Tonnage des États-Unis au Canada pour tous les groupes de denrées pour chaque accouplement origine-destination.**
- e) **Section 5 - 3 tableaux montrant la distribution de revenu total pour le trafic acheminé du Canada aux États-Unis et pour le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi le pourcentage canadien du revenu total pour chaque groupe de denrées pour chaque accouplement origine-destination.**

***NOTE:**

Le calcul de ce chiffre (le pourcentage du trafic en direction sud représenté par ce document) était modifié en 1976 pour exclure le trafic en provenance des États-Unis à destination des États-Unis (trafic intermédiaire) du chiffre qui était utilisé pour toutes les classes de chemin de fer et pour tous types de trafic du tonnage payant transporté du Canada aux États-Unis. Le tableau suivant montre le pourcentage de trafic en direction sud représenté par ce document en utilisant les deux manières de calcul pour les années 1974 jusqu'à présent.

Introduction

This document, Reference Paper No. 3.3, analyses 1976 carload revenue freight traffic originating in Canada and terminating in the United States and traffic originating in the United States and terminating in Canada and moving over the lines of Canadian National Railways and CP Rail.

This paper shows that Canada to United States traffic via Canadian National Railways and CP Rail amounted to 27.7 million tons and 875.9 million dollars while United States to Canada traffic via the same two major railways totalled 10.1 million tons and 393.5 million dollars, or 2.7 times as much southbound tons as northbound tons and 2.2 times as much revenue. Southbound tonnage and revenue increased by 16.7% and 30.2% respectively over 1975 figures while northbound tonnage decreased by 8.2% as revenue increased by 4.9%.

Introduction

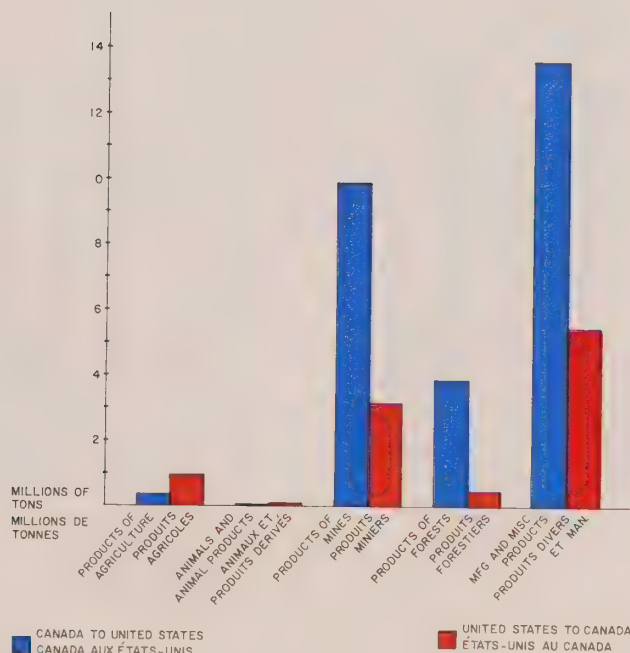

Ce papier, document de référence n° 3.3, est une analyse du trafic payant par wagons complets (1976) en provenance du Canada à destination des États-Unis et en provenance des États-Unis à destination du Canada et acheminé sur les voies des Chemins de fer Nationaux et du Canadien Pacifique.

Ce document montre que le trafic provenant du Canada à la destination des États-Unis était de 27.7 millions de tonnes et valait 875.9 millions de dollars. Le trafic provenant des États-Unis et terminé au Canada était de 10.1 millions de tonnes et valait 393.5 millions de dollars. En autres mots, il y avait 2.7 fois autant du trafic vers le sud que de trafic vers le nord et comprenant 2.2 fois le revenu. Le tonnage et le revenu pour le trafic vers le sud ont augmenté par 16.7% et 30.2% respectivement tandis que le tonnage et le revenu pour le trafic vers le nord ont diminué par 8.2% et augmenté par 4.9% respectivement.

TRAFFIC BETWEEN CANADA AND THE UNITED STATES

TRAFIC ENTRE CANADA ET LES ETATS-UNIS

TONS - 1976 - TONNES

The Canada-U.S. traffic is dominated by the following three Commodity Groupings: Manufactured and Miscellaneous Products - 49.1% of the tonnage and 49.4% of the revenue; Mine Products - 35.6% of the tonnage and 29.4% of the revenue; and Forest Products - 14.0% of the tonnage and 20.3% of the revenue. The U.S.-Canada traffic, on the other hand, is dominated by the following Commodity Groupings: Manufactured and Miscellaneous Products - 54.1% of the tonnage and 62.7% of the revenue; Mine Products - 31.4% of the tonnage and 15.8% of the revenue; and Products of Agriculture - 9.5% of the tonnage and 15.3% of the revenue. It can be seen from these figures and from graph # 1 that with the exception of Products of Agriculture the southbound traffic is generally much greater than the northbound traffic including Manufactured and Miscellaneous Products where the ratio of southbound to northbound traffic is 2.5 to 1.

Le trafic Canada-E.U. est dominé par les trois groupes suivants de denrées; manufactures et divers - 49.1% du tonnage et 49.4% du revenu; les miniers - 35.6% du tonnage et 29.4% du revenu; et les forestiers - 14.0% du tonnage et 20.3% du revenu. Le trafic E.U.-Canada, d'autre part, est dominé par les groupes suivants de denrées; manufactures et divers - 54.1% du tonnage et 62.7% du revenu; les miniers - 31.4% du tonnage et 15.8% du revenu; et les agricoles - 9.5% du tonnage et 15.3% du revenu. On peut voir en regardant ces statistiques et le graphique n^o 1 que le trafic vers le sud, à l'exception des agricoles, est en général beaucoup plus volumineux que le trafic vers le nord, manufactures et divers inclus où la proportion du trafic vers le sud au trafic vers le nord est 2.5 contre 1.

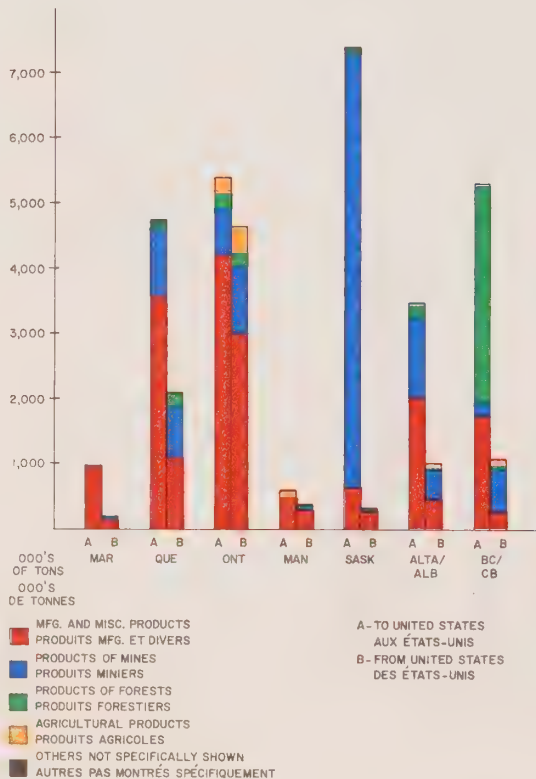

TRAFFIC BETWEEN CANADA AND THE UNITED STATES

BY STATE GROUP

TRAFIC ENTRE CANADA ET LES ETATS-UNIS

PAR GROUPES D'ETATS

TONS - 1976 - TONNES

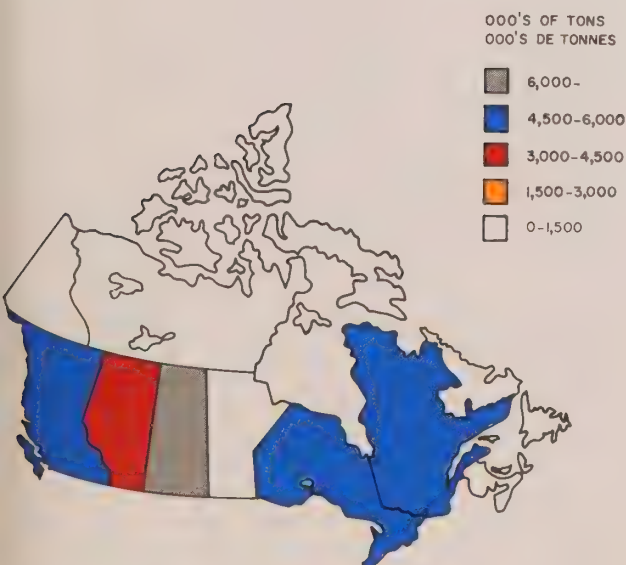

Graphs #2 and #3 illustrate the relative importing and exporting positions of each of the provinces and state groups in international revenue freight traffic. From a Canadian point of view, the major exporting provinces are Saskatchewan exporting Mine Products and Ontario/Quebec exporting Manufactured and Miscellaneous Products. Ontario/Quebec receive 70% of the tonnage terminating in Canada the bulk of which is Manufactured and Miscellaneous Products. In the United States the largest importing areas are NC2, NC3 and NE2 respectively. All three import mainly Manufactured and Miscellaneous Products while NC3 is the largest importer of Forest Products. The largest exporting areas are NC1, NC2, W1 and W2. The first two export mainly Manufactured and Miscellaneous Products while W1 and W2 export mainly Products of Mines.

Les graphiques n° 2 et 3 démontrent les rangs relatifs de chaque province et groupe d'états en exportation et en importation de trafic payant international. D'un point de vue canadien, les provinces qui sont à la tête sont Saskatchewan qui exporte le plus de produits miniers, et Ontario/Québec qui exportent le plus de produits manufacturés et divers. Ontario/Québec reçoivent 70% du tonnage à destination canadienne, dont la plupart se constitue de produits manufacturés et divers. Aux États-Unis les régions les plus importants en importation sont respectivement NC2, NC3, et NE2. Tous les trois importent pour la plupart les produits manufacturés et divers et les produits miniers tandis que NC3 est le plus grand importateur de produits forestiers. Les régions les plus importantes en exportation sont NC1, NC2, 01 et 02. Les deux premiers exportent pour la plupart les produits manufacturés et divers tandis que 01 et 02 exportent les produits miniers.

TRAFFIC ORIGINATING IN CANADA

TRAFFIC TERMINATING IN CANADA

TRAFIC TERMINE AU CANADA

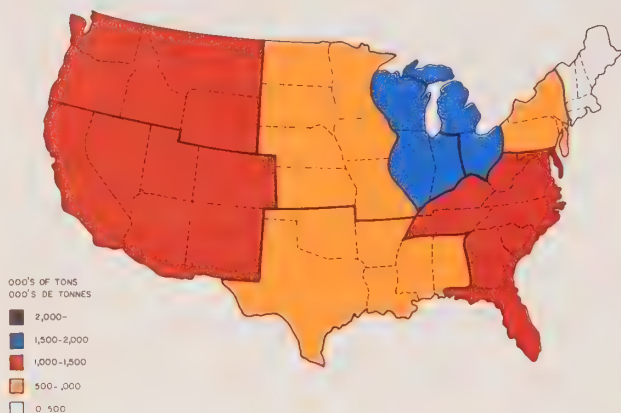

TONS - 1976 - TONNES

TRAFFIC ORIGINATING IN THE UNITED STATES

TRAFIC D'ORIGINE DES ETATS-UNIS

TONS - 1976 - TONNES

The import and export positions of the provinces and the state groups are further illustrated by the following diagrams.

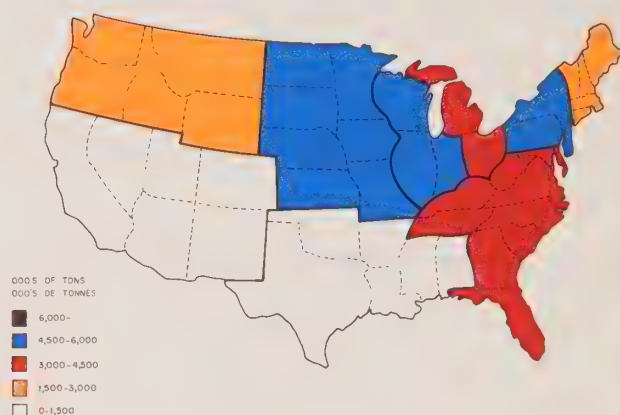

In terms of revenue, this analysis shows that in 1976 the two major Canadian railways received 48% or \$424 million of the \$876 million received by them and connecting United States railways for the transport of goods from Canada to the United States and 35% or \$139 million of the \$393 million received by all such railways for the transport of goods from the United States to Canada. For most origin-destination pairs the Canadian percentage of the revenue will be less than the American percentage which can be partly explained by the proximity to the international border of the majority of the Canadian population and industry.

In general, this analysis provides an overview of rail revenue freight traffic between Canadian provinces and nine groupings of American states. It was not deemed feasible in terms of document size and publication costs to produce the statistics for each of the American states and for each of the specific commodities listed in the Foreword. However, should individual state and/or commodity information be required, the Traffic and Tariffs Branch can supply the data on request on a cost recovery basis.

TRAFFIC TERMINATING IN THE UNITED STATES

TRAFIC TERMINE AUX ETATS-UNIS

TONS - 1976 - TONNES

Les rangs des provinces et des groupes d'états en importation et en exportations sont également démontrés par les graphiques suivants:

Quant au revenu, cette analyse fait voir que les deux principaux chemins de fer canadiens ont reçu 48% ou 424 millions de dollars de 876 millions de dollars reçu par ces mêmes entreprises et par les chemins de fer américains connexes pour le transport des produits du Canada aux États-Unis et 35% ou 139 millions de dollars de 393 millions de dollars touchés par ces mêmes entreprises ferroviaires pour le transport des produits des États-Unis au Canada. Pour la plupart des accouplements, le pourcentage canadien n'équivaut pas le pourcentage américain, ce qui explique partiellement par la proximité de la frontière internationale à la population et l'industrie canadienne.

En général, cette analyse représente une vue d'ensemble du trafic ferroviaire payant entre les provinces canadiennes et les neuf groupes d'états. On n'a pas pu produire raisonnablement en tenant compte des coûts de publication et de largeur du document les statistiques de chaque état américain et de chaque denrée individuelle enregistrée dans le Propos. La Direction d'exploitation et de tarifs peut, pourtant, si le besoin se présente, fournir des données pour les états individuels et/ou les denrées individuelles par la méthode du recouvrement de fonds.

SECTION 2 - 8 tables showing average revenue per ton (total Canada and U.S.), average revenue per ton (Canadian portion), average length of haul (to international boundary) and average load per car in a province-state origin-destination matrix by commodity groups. Traffic in both directions is represented.

SECTION 2 - 8 tableaux montrant le revenu moyen par tonne (total Canada et États-Unis), revenu moyen par tonne (portion canadienne), déplacement moyen (jusqu'à la frontière internationale) et chargement moyen par wagon dans une matrice province-état origine-destination par groupes de denrées. Le trafic dans les deux directions est représenté.

SECTION 4 - 3 tables showing the distribution of tonnage for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the ratio of Canada to U.S. tonnage versus U.S. to Canada tonnage for all commodity groups for each origin-destination pairing.

SECTION 4 - 3 tableaux montrant la distribution du tonnage pour le trafic acheminé du Canada aux États-Unis et le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi la proportion du tonnage du Canada aux États-Unis contre le tonnage des États-Unis au Canada pour tous les groupes de denrées pour chaque accouplement origine-destination.

PREFACE

This document is published as Reference Paper No. 3.4, the fourth supplement to Reference Paper No. 3 of the Traffic & Tariffs Branch of the Canadian Transport Commission entitled "Commodity Flow Analysis, 1968-1973, Carload All-Rail Traffic Between Canada and the United States." These Reference Papers complement the Commodity Flow Analysis series for domestic rail traffic for the years 1968 to 1977, (Reference Papers Nos. 1 through 1.5). When combined, these papers complete an analysis of Canadian carload all-rail traffic both domestic and international.

Since the inception of these Reference Papers, the information retrieval system has developed to the point where the Traffic & Tariffs Branch is currently prepared to supply, on request and at a cost recovery basis, details of traffic flows between Canadian provinces and American States for each of the 69 individual commodities listed in the Foreword.

The traffic movements represented by these Reports is gradually expanding and becoming more detailed. It is hoped that these Reference Papers will help to promote a better understanding of Canadian railway freight traffic and its influence on the Canadian economy.

D.C. Hackston,
Executive Director,
Traffic & Tariffs Branch,
Canadian Transport Commission.

PREFACE

Ce document est publié comme le document de référence n^o 3.4, le quatrième supplément au document de référence n^o 3 de la Direction de l'exploitation et des tarifs de la Commission canadienne des transports intitulé «Analyse du Volume des Denrées, 1968-1973, Trafic entièrement ferroviaire par wagons complets entre le Canada et les États-Unis.» Ces documents de référence complètent la série des analyses de volumes de denrées du trafic ferroviaire domestiques des années 1968 à 1977, (documents de référence n^o 1 à 1.5). En combinaison, ces documents complètent un analyse du trafic canadien entièrement ferroviaire par wagon complet, national et international, tous les deux.

Depuis le commencement de ces documents de référence, le système de retrouver l'information a été développé au point où la Direction de l'exploitation et des tarifs s'apprête couramment à fournir sur demande et sur une base de recouvrement des fonds, des détails, des volumes entre les provinces canadiennes et les états américains pour chaque des 69 denrées individuelles enregistrées dans le Propos.

L'analyse des mouvements de trafic représentés par ces documents s'étend et se détaille d'avantage. Il est espéré que ces documents de référence ouvriront la voie à la promotion d'une meilleure compréhension du trafic canadien ferroviaire et de son influence sur l'économie canadienne.

D.C. Hackston,
Directeur exécutif,
Direction de l'Exploitation
et des Tarifs,
Commission canadienne des transports.

Foreword

The data set out in this Reference Paper No. 3.4 of the Traffic and Tariffs Branch of the Canadian Transport Commission was derived from the computer tape records of Canadian National Railways and CP Rail. The program for extraction of the data was designed and prescribed by the Traffic and Tariffs Branch. The resulting computer tapes were used to derive the 32 statistical tables contained in this Reference Paper.

The following types of movement were excluded from the program:

- a) Less-than-carload traffic;
- b) Express and non-carload traffic;
- c) Lake-and-rail and Rail-lake-and-rail carload movements;
- d) Container traffic;
- e) Piggyback Movements;
- f) Traffic originating (Canada to U.S.) and terminating (U.S. to Canada) on lines other than Canadian National and CP Rail;
- g) Freight carried on company service (O.C.S.).

This Reference Paper, therefore, consists of a one-year (1977) analysis of carload revenue freight traffic originating in Canada and terminating in the United States and traffic originating in the United States and terminating in Canada. This analysis includes import and export traffic from Canadian and American ports (i.e. to or from countries other than Canada and the United States) and also a small amount of traffic moving from an American origin to an American destination using Canadian railway lines on some segment of the movement. It is estimated that the data contained in this Reference Paper approximates 85%* of the total revenue tonnage on all classes of railways for all types of traffic moving from Canada to the United States and 63% of the total revenue tonnage on all classes of railways for all types of traffic moving from the United States to Canada.

The commodity groupings used in this Reference Paper are as follows:

- a) Products of Agriculture
- b) Animals and Animal Products
- c) Products of Mines
- d) Products of Forests
- e) Manufactured and Miscellaneous Products

Avant-Propos

Les données qui renferme ce document de référence n° 3.4 de la Direction de l'exploitation et des tarifs de la Commission canadienne des transports ont été tirées des enregistrements mécanographiés des Chemins de fer Nationaux et du Canadien Pacifique. Le programme d'extraction des données a été conçu et préconisé par la Direction de l'exploitation et des tarifs. Les rubans ont servi à l'établissement des 32 tableaux de statistiques inclus dans ce document de référence.

Les classes suivantes des mouvements ont été exclues du programme:

- a) Trafic de détail;
- b) Messageries et chargements incomplets;
- c) Mouvements par wagons complets eau - rail et rail - eau - rail;
- d) Mouvements de containers;
- e) Remorques-rail-route;
- f) Trafic provenant du Canada à destination des États-Unis ou vice versa acheminé sur les lignes autres que celles des Chemins de fer Nationaux ou du Canadien Pacifique;
- g) Fret transporté pour les besoins de la société.

Ce document de référence, alors, comprend une analyse d'une année (1977) du trafic payant par wagons complets en provenance du Canada à destination des États-Unis et du trafic provenant des États-Unis à destination du Canada. Cette analyse inclue du trafic d'importation et d'exportation acheminé des ports canadiens et américains (c'est-à-dire, jusqu'aux ou en provenance des pays autres que le Canada et les États-Unis) et inclue également un certain volume du trafic acheminé d'une origine américaine à destination d'un endroit américain par des chemins de fer canadiens pour une partie du mouvement. On estime que les données incluses dans ce document de référence comprennent approximativement 85%* du total du tonnage payant en provenance du Canada et à destination des États-Unis par toutes les classes de chemin de fer, et ce, pour tous types de mouvement. Elles représentent 63% du total du tonnage payant de tout genre de trafic acheminé par toutes les classes de chemin de fer des États-Unis jusqu'au Canada.

Les groupes de denrées qui renferme ce document de référence sont comme suit

- a) Produits agricoles
- b) Animaux et produits dérivés
- c) Produits miniers
- d) Produits forestiers
- e) Manufactures et produits divers

The major commodities in each group are:

PRODUCTS OF AGRICULTURE

Wheat
Other grain
Grain Products
Potatoes
Other vegetables, fresh and frozen
Fruits, fresh and frozen
Other agricultural products

ANIMALS & ANIMAL PRODUCTS

Livestock
Meats, fresh and frozen
Other meats, fish and packing house products (edible)
Other animal products

PRODUCTS OF MINES

Coal
Potash
Sulphur
Iron ore and concentrates (incl pellets)
Copper ores and concentrates
Copper-nickel ores and concentrates
Lead and zinc ores and concentrates
Other ores and concentrates
Alumina, bauxite and other aluminum ores
Sand, gravel and crushed stone
Gypsum, crude
Cement, natural and portland
Asbestos, crude
Phosphate rock
Salt
Other mine products
Coke

PRODUCTS OF FORESTS

Lumber
Plywood
Pulpwood
Pulpwood chips
Logs, poles and other forest products

MANUFACTURED & MISCELLANEOUS

Iron and steel - Primary and manufactured
Aluminum - Primary and manufactured
Copper - Primary and manufactured
Non-ferrous metals, n.e.s. - Primary and manufactured
Scrap and waste metals
Machinery and parts
Passenger automobiles
Freight automobiles
Agricultural implements and parts
Other motor vehicles
Vehicle parts
Gasoline
Fuel Oil
Liquified petroleum gas
Other refined petroleum products
Sulphuric acid

Les denrées principales de chaque groupe sont:

PRODUITS AGRICOLES

Blé
Autres céréales
Produits céréaliers
Pommes de terre
Autres légumes frais et congelés
Fruits, frais et congelés
Autres produits agricoles

ANIMAUX ET PRODUITS DÉRIVÉS

Bétail
Viandes fraîches et congelées
Autres viandes, poissons et conserves comestibles
Autres produits d'origine animale

PRODUITS MINIERES

Charbon
Potasse
Soufre
Minerais et concentrés de fer (y compris les boulettes)
Minerais et concentrés de cuivre
Minerais et concentrés de cuivre-nickel
Minerais et concentrés de plomb et de zinc
Autres minerais et concentrés
Alumine, bauxite et autres minerais d'aluminium
Sable, gravier et pierre concassée
Gypse brut
Ciment naturel et Portland
Amiante brut
Phosphate en roche
Sel
Autres produits miniers
Coke

PRODUITS FORESTIERS

Bois de construction
Contre-plaqué
Bois à pâte
Copeaux de bois à pâte
Billes, poteaux et autres produits forestiers

MANUFACTURES ET PRODUITS DIVERS

Fer et acier - primaires et ouvrés
Aluminium - primaire et ouvré
Cuivre - primaire et ouvré
Métaux non ferreux, n.d.s. - primaires et ouvrés
Débris de métaux
Machines et pièces
Voitures particulières
Véhicules utilitaires
Machines agricoles et pièces
Autres véhicules automobiles
Pièces de véhicules
Essence
Mazout
Gaz de pétrole liquéfiés
Autres dérivés raffinés du pétrole
Acide sulfurique

Salt cake (sodium sulphate)
 Gases other than petroleum
 Other chemicals and acids
 Woodpulp
 Newsprint paper
 Paperboard, pulpboard and fibreboard
 Paper other than newsprint
 Packaging containers (not C.O.F.C. containers)
 Building materials
 Sugar
 Beverages
 Dairy and other food products
 Animal and poultry feed
 Vegetable oils
 Plastic and cellulose products
 Fertilizers (excluding potash)
 Manufactured and miscellaneous goods
 Pool car traffic

Throughout the document, the data has been arranged in origin-destination matrices of provinces and states. The four Atlantic Provinces (New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland) have been considered as a single 'province' reducing the number of 'provinces' to seven as follows:

- | | |
|--------------|---------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Quebec | 6) Alberta |
| 3) Ontario | 7) British Columbia |
| 4) Manitoba | |

For the purposes of this document, the United States includes, with the exception of Hawaii, all states plus the District of Columbia. The states have been grouped into nine major groupings based on the U.S. Census Divisions and on our own examination of the traffic flow between Canada and the United States.

Northeast 1 (NE1)	Northeast 2 (NE2)
Maine	New York
New Hampshire	New Jersey
Vermont	Pennsylvania

Massachusetts
 Connecticut
 Rhode Island

Northcentral 1 (NC1)	Northcentral 2 (NC2)
Michigan	Illinois
Ohio	Indiana
	Wisconsin

Northcentral 3 (NC3)
 Minnesota
 Iowa
 Missouri
 North Dakota
 South Dakota
 Nebraska
 Kansas

Salignon (sulfate de soude)
 Gaz autres que de pétrole
 Autres produits chimiques et acides
 Pâte de bois
 Papier journal
 Carton, carton-pâte et carton-fibre
 Papier autres que le papier journal
 Conteneurs (autres que pour rail-route)
 Matériaux de construction
 Sucre
 Boissons
 Produits laitiers et autres produits alimentaires
 Aliments pour animaux et volaille
 Huiles végétales
 Produits en plastique et en cellulose
 Engrais (sauf la potasse)
 Produits ouvrés et divers
 Trafic de marchandises en commun

Les données qui renferme ce document ont été présentées dans des matrices d'origine-destination des provinces et des états. Les quatre provinces maritimes (le Nouveau-Brunswick, La Nouvelle-Écosse, l'Île-du-Prince-Édouard et Terre-Neuve) ont été traitées comme une province unique, ce qui a réduit le nombre de «provinces» à sept comme suit:

- | | |
|--------------|-------------------------|
| 1) Maritimes | 5) Saskatchewan |
| 2) Québec | 6) Alberta |
| 3) Ontario | 7) Colombie-Britannique |
| 4) Manitoba | |

Aux fins de ce document, les États-Unis comprennent (à l'exception de Hawaii) tous les états, et en plus, le District de la Colombie. Les états ont été rassemblés dans neuf groupes principaux qui sont fondés sur notre propre analyse et celle de U.S. Census Divisions des mouvements entre le Canada et les États-Unis.

AMERICAN ORIGINS AND DESTINATIONS**ORIGINES ET DESTINATIONS AMÉRICAINES****CANADIAN ORIGINS AND DESTINATIONS****ORIGINES ET DESTINATIONS CANADIENNES**

The 32 statistical tables are grouped in five sections as follows:

- a) Section 1 - 12 tables showing cars, tons, Canadian Revenue, American Revenue, ton-miles and car-miles to the international boundary in a province-state origin-destination matrix, by commodity groups. Both Canada to the United States and United States to Canada traffic are represented.
- b) Section 2 - 8 tables showing average revenue per ton (total Canada and U.S.), average revenue per ton (Canadian portion), average length of haul (to international boundary) and average load per car in a province-state origin-destination matrix, by commodity groups. Traffic in both directions is represented.
- c) Section 3 - 6 tables showing Canada originated traffic, Canada terminated traffic, United States originated traffic and United States terminated traffic, by commodity groups, in terms of cars, tons, Canadian revenue, American revenue, ton-miles and car-miles to the international boundary with a percentage distribution by commodity group.
- d) Section 4 - 3 tables showing the distribution of Tonnage for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the ratio of Canada to U.S. Tonnage versus U.S. to Canada Tonnage for all commodity groups for each origin-destination pairing.
- e) Section 5 - 3 tables showing the distribution of Total Revenue for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the Canadian percentage of the Total Revenue for each commodity group for each origin-destination pairing.

***NOTE:**
The calculation of this figure (percentage of total south-bound traffic represented by this document) was altered in 1976 to exclude traffic received from U.S. rail connections destined to U.S. rail connections (overhead traffic) from the figure used for all classes of railways for all types of revenue freight traffic moving from Canada to the United States. The following table shows the percentage of southbound traffic represented by this document using both methods of calculation for the years 1974 to present.

YEAR/ANNEE	OVERHEAD INCLUDED INTERMEDIAIRE INCLUS	OVERHEAD EXCLUDED INTERMEDIAIRE EXCLUS
1977	70%	82%
1976	71%	85%
1975	71%	86%
1974	75%	92%

Les 32 tableaux de statistiques sont groupés en cinq sections comme suit:

- a) Section 1 - 12 tableaux montrant wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à destination de la frontière internationale dans une matrice province-état origine-destination, par groupes de denrées. Le trafic du Canada aux États-Unis et celui des États-Unis au Canada sont tous les deux représentés.
- b) Section 2 - 8 tableaux montrant le revenu moyen par tonne (total Canada et États-Unis), revenu moyen par tonne (portion canadienne), déplacement moyen (jusqu'à la frontière internationale) et chargement moyen par wagon dans une matrice province-état origine-destination, par groupes de denrées. Le trafic dans les deux directions est représenté.
- c) Section 3 - 6 tableaux présentant le trafic provenant du Canada, le trafic terminé au Canada, le trafic provenant des États-Unis et le trafic terminé aux États-Unis, par groupes de denrées, en termes de wagons, tonnes, revenu canadien, revenu américain, tonne-milles et wagon-milles à la frontière internationale avec un pourcentage de distribution par groupe de denrée.
- d) Section 4 - 3 tableaux montrant la distribution du Tonnage pour le trafic acheminé du Canada aux États-Unis et le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi la proportion du Tonnage du Canada aux États-Unis contre le Tonnage des États-Unis au Canada pour tous les groupes de denrées pour chaque accouplement origine-destination.
- e) Section 5 - 3 tableaux montrant la distribution de revenu total pour le trafic acheminé du Canada aux États-Unis et pour le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi le pourcentage canadien du revenu total pour chaque groupe de denrées pour chaque accouplement origine-destination.

***NOTE:**
Le calcul de ce chiffre (le pourcentage du trafic en direction sud représenté par ce document) était modifié en 1976 pour exclure le trafic en provenance des États-Unis à destination des États-Unis (trafic intermédiaire) du chiffre qui était utilisé pour toutes les classes de chemin de fer et pour tous types de trafic du tonnage payant transporté du Canada aux États-Unis. Le tableau suivant montre le pourcentage de trafic en direction sud représenté par ce document en utilisant les deux manières de calcul pour les années 1974 jusqu'à présent.

Introduction

This document, Reference Paper No. 3.4, analyses 1977 carload revenue freight traffic originating in Canada and terminating in the United States and traffic originating in the United States and terminating in Canada and moving over the lines of Canadian National Railways and CP Rail.

This paper shows that Canada to United States traffic via Canadian National Railways and CP Rail amounted to 30.6 million tons and 1,022.6 million dollars while United States to Canada traffic via the same two major railways totalled 9.49 million tons and 391.1 million dollars, or 3.2 times as much southbound tons as northbound tons and 2.6 times as much revenue. Southbound tonnage and revenue increased by 10.3% and 16.7% respectively over 1976 figures while northbound tonnage decreased by 6.0%, as revenue decreased by 0.6%.

Introduction

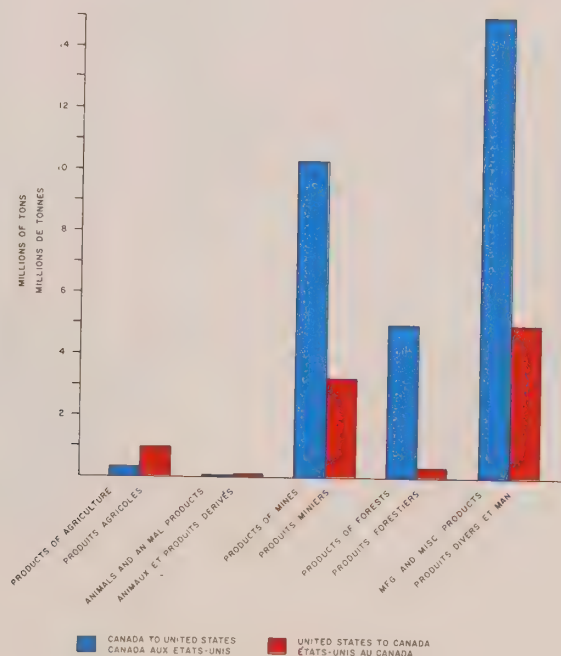

Ce papier, document de référence n° 3.4, est une analyse du trafic payant par wagons complets (1977) en provenance du Canada à destination des États-Unis et en provenance des États-Unis à destination du Canada et acheminé sur les voies des Chemins de fer Nationaux et du Canadien Pacifique.

Ce document montre que le trafic provenant du Canada à la destination des États-Unis était de 30.6 millions de tonnes et valait 1,022.6 millions de dollars. Le trafic provenant des États-Unis et terminé au Canada était de 9.49 millions de tonnes et valait 391.1 millions de dollars. En autres mots, il y avait 3.2 fois autant du trafic vers le sud que de trafic vers le nord et comprenant 2.6 fois le revenu. Le tonnage et le revenu pour le trafic vers le sud ont augmenté par 10.3% et 16.7% respectivement tandis que le tonnage et le revenu pour le trafic vers le nord ont diminué par 6.0%, et par 0.6% respectivement.

TRAFFIC BETWEEN CANADA AND THE UNITED STATES

TRAFIC ENTRE CANADA ET LES ETATS-UNIS

TONS - 1977 - TONNES

The Canada-U.S. traffic is dominated by the following three Commodity Groupings: Manufactured and Miscellaneous Products - 49.0% of the tonnage and 48.0% of the revenue; Mine Products - 33.5% of the tonnage and 28.0% of the revenue; and Forest Products - 16.3% of the tonnage and 23.0% of the revenue. The U.S.-Canada traffic, on the other hand, is dominated by the following Commodity Groupings; Manufactured and Miscellaneous Products - 51.8% of the tonnage and 61.0% of the revenue; Mine Products - 34.1% of the tonnage and 18.0% of the revenue; and Products of Agriculture - 10.5% of the tonnage and 17.0% of the revenue. It can be seen from these figures and from graph # 1 that with the exception of Products of Agriculture the southbound traffic is generally much greater than the northbound traffic including Manufactured and Miscellaneous Products where the ratio of southbound to northbound traffic is 3 to 1.

Le trafic Canada-E.U. est dominé par les trois groupes suivants de denrées; manufactures et divers - 49.0% du tonnage et 48.0% du revenu; les miniers - 33.5% du tonnage et 28.0% du revenu; et les forestiers - 16.3% du tonnage et 23.0% du revenu. Le trafic E.U.-Canada, d'autre part, est dominé par les groupes suivants de denrées; manufactures et divers - 51.8% du tonnage et 61.0% du revenu; les miniers - 34.1% du tonnage et 18.0% du revenu; et les agricoles - 10.5% du tonnage et 17.0% du revenu. On peut voir en regardant ces statistiques et le graphique n° 1 que le trafic vers le sud, à l'exception des agricoles, est en général beaucoup plus volumineux que le trafic vers le nord, manufactures et divers inclus où la proportion du trafic vers le sud au trafic vers le nord est 3 contre 1.

Graphs #2 and #3 illustrate the relative importing and exporting positions of each of the provinces and state groups in international revenue freight traffic. From a Canadian point of view, the major exporting provinces are Saskatchewan exporting Mine Products and Ontario/Quebec exporting Manufactured and Miscellaneous Products. Ontario/Quebec receive 71.0% of the tonnage terminating in Canada the bulk of which is Manufactured and Miscellaneous Products. In the United States the largest importing areas are NC2, NC3 and NE2 respectively. All three import mainly Manufactured and Miscellaneous Products and Mine Products while NC3 is the largest importer of Forest Products. The largest exporting areas are NC1, NC2, W1 and W2. The first two export mainly Manufactured and Miscellaneous Products while W1 and W2 export mainly Products of Mines.

Les graphiques n° 2 et 3 démontrent les rangs relatifs de chaque province et groupe d'états en exportation et en importation de trafic payant international. D'un point de vue canadien, les provinces qui sont à la tête sont Saskatchewan qui exporte le plus de produits miniers, et Ontario/Québec qui exportent le plus de produits manufacturés et divers. Ontario/Québec reçoivent 71.0% du tonnage à destination canadienne, dont la plupart se constitue de produits manufacturés et divers. Aux États-Unis les régions les plus importants en importation sont respectivement NC2, NC3, et NE2. Tous les trois importent pour la plupart les produits manufacturés et divers et les produits miniers tandis que NC3 est le plus grand importateur de produits forestiers. Les régions les plus importantes en exportation sont NC1, NC2, 01 et 02. Les deux premiers exportent pour la plupart les produits manufacturés et divers tandis que 01 et 02 exportent les produits miniers.

TONS - 1977 - TONNES

The import and export positions of the provinces and the state groups are further illustrated by the following diagrams.

In terms of revenue, this analysis shows that in 1977 the two major Canadian railways received 48.0% or \$487 million of the \$1022 million received by them and connecting United States railways for the transport of goods from Canada to the United States and 37.0% or \$143 million of the \$391 million received by all such railways for the transport of goods from the United States to Canada. For most origin-destination pairs the Canadian percentage of the revenue will be less than the American percentage which can be partly explained by the proximity to the international border of the majority of the Canadian population and industry.

In general, this analysis provides an overview of rail revenue freight traffic between Canadian provinces and nine groupings of American states. It was not deemed feasible in terms of document size and publication costs to produce the statistics for each of the American states and for each of the specific commodities listed in the Foreword. However, should individual state and/or commodity information be required, the Traffic and Tariffs Branch can supply the data on request on a cost recovery basis.

Les rangs des provinces et des groupes d'états en importation et en exportations sont également démontrés par les graphiques suivants:

Quant au revenu, cette analyse fait voir que les deux principaux chemins de fer canadiens ont reçu 48.0% ou 487 millions de dollars de 1022 millions de dollars reçu par ces mêmes entreprises et par les chemins de fer américains connexes pour le transport des produits du Canada aux États-Unis et 37.0% ou 143 millions de dollars de 391 millions de dollars touchés par ces mêmes entreprises ferroviaires pour le transport des produits des États-Unis au Canada. Pour la plupart des accouplements, le pourcentage canadien n'équivaut pas le pourcentage américain, ce qui explique partiellement par la proximité de la frontière internationale à la population et l'industrie canadienne.

En général, cette analyse représente une vue d'ensemble du trafic ferroviaire payant entre les provinces canadiennes et les neuf groupes d'états. On n'a pas pu produire raisonnablement en tenant compte des coûts de publication et de largeur du document les statistiques de chaque état américain et de chaque denrée individuelle enregistrée dans le Propos. La Direction d'exploitation et de tarifs peut, pourtant, si le besoin se présente, fournir des données pour les états individuels et/ou les denrées individuelles par la méthode du recouvrement de fonds.

SECTION 2 - 8 tables showing average revenue per ton (total Canada and U.S.), average revenue per ton (Canadian portion), average length of haul (to international boundary) and average load per car in a province-state origin-destination matrix by commodity groups. Traffic in both directions is represented.

SECTION 2 - 8 tableaux montrant le revenu moyen par tonne (total Canada et États-Unis), revenu moyen par tonne (portion canadienne), déplacement moyen (jusqu'à la frontière internationale) et chargement moyen par wagon dans une matrice province-état origine-destination par groupes de denrées. Le trafic dans les deux directions est représenté.

SECTION 4 - 3 tables showing the distribution of tonnage for Canada to United States traffic and for United States to Canada traffic for all commodity groups and also showing the ratio of Canada to U.S. tonnage versus U.S. to Canada tonnage for all commodity groups for each origin-destination pairing.

SECTION 4 - 3 tableaux montrant la distribution du tonnage pour le trafic acheminé du Canada aux États-Unis et le trafic des États-Unis au Canada pour tous les groupes de denrées et montrant aussi la proportion du tonnage du Canada aux États-Unis contre le tonnage des États-Unis au Canada pour tous les groupes de denrées pour chaque accouplement origine-destination.
